

Allspring Global Dividend Opportunity Fund (EOD)

Annual Report

OCTOBER 31, 2024

Notice to Shareholders

- On November 14, 2024, the Fund announced a renewal of its open-market share repurchase program (the "Buyback Program"). Under the renewed Buyback Program, the Fund may repurchase up to 5% of its outstanding shares in open market transactions during the period beginning on January 1, 2025 and ending on December 31, 2025. The Fund's Board of Trustees has delegated to Allspring Funds Management, LLC, the Fund's adviser, discretion to administer the Buyback Program, including the determination of the amount and timing of repurchases in accordance with the best interests of the Fund and subject to applicable legal limitations.
- The Fund's managed distribution plan provides for the declaration of quarterly distributions to common shareholders of the Fund at an annual minimum fixed rate of 9% based on the Fund's average monthly net asset value per share over the prior 12 months. Under the managed distribution plan, quarterly distributions may be sourced from income, paid-in capital, and/or capital gains, if any. To the extent that sufficient investment income is not available on a quarterly basis, the Fund may distribute long-term capital gains and/or return of capital to its shareholders in order to maintain its managed distribution level. You should not draw any conclusions about the Fund's investment performance from the amount of the Fund's distributions or from the terms of the managed distribution plan. Shareholders may elect to reinvest distributions received pursuant to the managed distribution plan in the Fund under the existing dividend reinvestment plan, which is described later in this report.

The views expressed are subject to change at any time in response to changing circumstances in the market. Allspring Global Investments disclaims any obligation to publicly update or revise any views expressed or forward-looking statements.

Performance highlights

Investment objective	The Fund's primary investment objective is to seek a high level of current income. The Fund's secondary objective is long-term growth of capital.
Strategy summary	The Fund allocates its assets between two separate investment strategies, or sleeves. Under normal market conditions, the Fund allocates approximately 80% of its total assets to an equity sleeve comprised primarily of common stocks and other equity securities that offer above-average potential for current and/or future dividends. This sleeve normally invests in approximately 60 to 80 securities, broadly diversified among major sectors and regions. The sector and region weights are typically within +/- 5 percent of weights in the MSCI ACWI (Net)†. The remaining approximately 20% of the Fund's total assets is allocated to a sleeve consisting of below investment grade (high yield) debt, loans, and preferred stocks. The Fund also employs an option strategy in an attempt to generate gains on call options written by the Fund.

Figures quoted represent past performance, which is no guarantee of future results, and do not reflect taxes that a shareholder may pay on an investment in a fund. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted, which assumes the reinvestment of dividends and capital gains. Performance figures of the Fund do not reflect brokerage commissions that a shareholder would pay on the purchase and sale of shares. If taxes and such brokerage commissions had been reflected, performance would have been lower. To obtain performance information current to the most recent month-end, please call 1-800-222-8222.

Please keep in mind that high double-digit returns were primarily achieved during favorable market conditions. You should not expect that such favorable returns can be consistently achieved. A fund's performance, especially for short time periods, should not be the sole factor in making your investment decision.

The Fund's expense ratio for the year ended October 31, 2024, was 2,77% which includes 1.54% of dividends on securities sold short and interest expense.

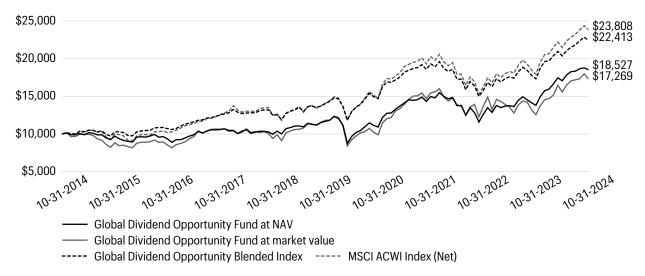

- 1 Total returns based on market value are calculated assuming a purchase of common stock on the first day and a sale on the last day of the period reported. Total returns based on NAV are calculated based on the NAV at the beginning of the period and at the end of the period. Dividends and distributions, if any, are assumed for the purposes of these calculations to be reinvested at prices obtained under the Fund's Automatic Dividend Reinvestment Plan.

GROWTH OF \$10,000 INVESTMENT AS OF OCTOBER 31, 20241

¹ The chart compares the performance of the Fund for the most recent ten years with the Global Dividend Opportunity Blended Index and MSCI ACWI (Net). The chart assumes a hypothetical investment of \$10,000 investment and reflects all operating expenses of the Fund.

COMPARISON OF NAV VS. MARKET VALUE¹

¹ This chart does not reflect any brokerage commissions charged on the purchase and sale of the Fund's common shares. Dividends and distributions paid by the Fund are included in the Fund's average annual total returns but have the effect of reducing the Fund's NAV.

Risk summary

This closed-end fund is no longer available as an initial public offering and is only offered through broker-dealers on the secondary market. A closed-end fund is not required to buy its shares back from investors upon request. Shares of the Fund may trade at either a premium or discount relative to the Fund's net asset value, and there can be no assurance that any discount will decrease. The values of, and/or the income generated by, securities held by the Fund may decline due to general market conditions or other factors, including those directly involving the issuers of such securities. Equity securities fluctuate in value in response to factors specific to the issuer of the security. Small- and mid-cap securities may be subject to special risks associated with narrower product lines and limited financial resources compared with their large-cap counterparts and, as a result, small- and mid-cap securities may decline significantly in market downturns and may be more volatile than those of larger companies due to their higher risk of failure. Debt securities are subject to credit risk and interest rate risk, and high-yield securities and unrated securities of similar credit quality have a much greater risk of default and their values tend to be more volatile than higher-rated securities with similar maturities. Foreign investments may contain more risk due to the inherent risks associated with changing political climates, foreign market instability, and foreign currency fluctuations. Risks of foreign investing are magnified in emerging or developing markets. Derivatives involve risks, including interest rate risk, credit risk, the risk of improper valuation, and the risk of noncorrelation to the relevant instruments they are designed to hedge or closely track. There are numerous risks associated with transactions in options on securities and/or indexes. As a writer of an index call option, the Fund forgoes the opportunity to profit from increases in the values of securities held by the Fund. However, the Fund has retained the risk of loss (net of premiums received) should the price of the Fund's portfolio securities decline. Similar risks are involved with writing call options or secured put options on individual securities and/or indexes held in the Fund's portfolio. This combination of potentially limited appreciation and potentially unlimited depreciation over time may lead to a decline in the net asset value of the Fund. The Fund is leveraged through a revolving credit facility and also may incur leverage by issuing preferred shares in the future. The use of leverage results in certain risks, including, among others, the likelihood of greater volatility of the net asset value and the market value of common shares.

More detailed information about the Fund's investment objective, principal investment strategies and the principal risks associated with investing in the Fund can be found on page 9.

MANAGER'S DISCUSSION

Overview

The Fund's return based on market value was 37.42% for the 12-month period that ended October 31, 2024. During the same period, the Fund's return based on its net asset value (NAV) was 34.22%. Based on both its market value and its NAV return, the Fund outperformed the Global Dividend Opportunity Blended Index for the 12-month period that ended October 31, 2024.

Global equities rallied at 2023 year-end and through October 2024.

Over the 12-month period, global equities rallied significantly, supported by disinflation, expectations for rate cuts by major central banks, solid corporate earnings, resilient consumer spending, and growing signs of a soft landing for many developed economies. Enthusiasm over artificial intelligence (AI) continued to dominate the market narrative as the massive buildout continued. Decelerating economic activity eased price pressures in the services sector, paving the way for central banks to implement gradual rate cuts. Beginning in mid-July, smaller-cap stocks and ratesensitive sectors rallied as global equity returns broadened from the prevailing dominance of U.S. mega-cap, technology-focused companies. However, over the full 12-month period, large caps outperformed small caps and growth outperformed value.

Broadcom, Inc.	1.97

¹ Figures represent the percentage of the Fund's net assets. Holdings are subject to change and may have changed since the date specified.

The equity sleeve adapted to persistent inflation, higher interest rates, and decelerating growth.

The strategy employs a blended approach between investing in higher dividend-paying value stocks and low- or non-dividend-paying growth stocks. At least 90% of equity investments are in dividend-paying stocks and the strategy continued to achieve a dividend that is 1.5 to 2.0 percentage points higher than the benchmark. The AI theme led the way within the equity sleeve as four stocks surged more than 100% during the 12-month period.

Within information technology (IT), Taiwan Semiconductor surged 123% while another semiconductor company, Broadcom, Inc., gained 103%. Dell Technologies, a leading IT hardware, software, and solutions provider, returned 86%. Two industrial companies, Hitachi in Japan and EMCOR in the U.S., both benefited from higher Al-related revenue. Bottom performers were led by earnings shortfalls by companies across diverse industries and regions. Evolution AB, a Swedish gaming software developer, fell 30% during the shortened period it was held within the portfolio. Atkore, a U.S. industrials company, declined 46% for the portion of the year it was held in the portfolio, while Chinese drug developer China Medical sold off 39%. All three stocks had low weights in the strategy and were sold during 2024.

The high yield market was buoyed by a healthy economy.

U.S. economic growth remained healthy over the past 12 months, rising 2.7% year over year in the period that ended September 2024. Personal consumption remained the driving force of the U.S. expansion, fueled by disposable income growth and historically elevated household net worths driven by the wealth effects stemming from strong home and stock price appreciation. The Federal Reserve's (Fed's) policy of higher for longer continued to exert downward pressure on cyclical sectors such as housing and manufacturing, which resulted in both sectors remaining in mild recessions. Despite restrictive interest rates, corporate earnings saw healthy growth and layoffs remained subdued. Geopolitical tensions rose with the introduction of the Israel/Hamas conflict along with the ongoing conflict between Russia and Ukraine.

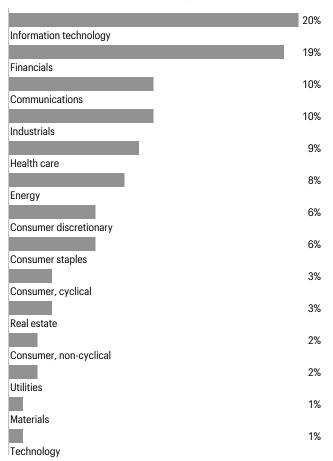

The labor market remained historically healthy with nonfarm payroll growth averaging 181,000 per month during the reference period, but it normalized as job openings fell below pre-COVID levels and the unemployment rate rose 0.6% to finish the period at 4.1%. The increase in the unemployment rate was driven by subdued labor turnover and an increase in labor supply, which together left the labor market balanced. Price pressures also continued to ease with the U.S. Consumer Price Index (CPI)* excluding food and energy dropping from 4.0% to 3.3% year over year as of September 2024.

After an extended pause at a target range of 5.25-5.50%, the Federal Open Market Committee (FOMC) joined along with G10 central bank peers and began its rate-cutting cycle at the September 2024 FOMC meeting with a 50-basis-point (bp; 100 bps equal 1.00%) cut. The federal funds rate ended the period at a target range of 4.75-5.00% with expectations of an additional 100 bps of cuts to come in 2025 given the balanced risks between the Fed's employment and inflation mandates.

The U.S. high yield market returned 16.5% in the 12 months that ended in October 2024. Financial conditions steadily eased, allowing the trailing 12month default rate to decline to 1.3% from 2.3% and the high yield optionadjusted spread to tighten to 288 bps from 445 bps.

The U.S. Consumer Price Index (CPI) is a measure of the average change over time in the prices paid by urban consumers for a market basket of consumer goods and services. You cannot invest directly in an index.

SECTOR ALLOCATION AS OF OCTOBER 31, 20241

¹ Figures represent the percentage of the Fund's long-term investments. Allocations are subject to change and may have changed since the date specified.

The high yield sleeve reduced its duration underweight among other changes to positioning.

The Fund ended the period slightly underweight yield, spread, and duration compared with the benchmark. During the year, the high yield sleeve reduced its duration underweight by three-tenths of a year. By we increased our allocation to telecom-wireline, software/services, and health services while trimming our positions in support services, electric generation, and media content. The Fund reduced its underweight to BB-rated bonds and moved its allocation to B-rated bonds from a slight overweight to an underweight.

The option overlay strategy offers protection in down markets.

The option overlay* is a short-call strategy written on a portion of the Fund's global equity allocation. The combined global equity and short option portfolio create a global covered call portfolio. Over the long run, a covered call strategy aims to add yield and lower risk compared with a passive allocation to equity. The option overlay is expected to add value in flat-to-down global equity markets and in above-average volatility environments.

IT, consumer staples, and industrials stocks contributed to relative performance.

Within the equity sleeve, the strategy often underperforms the MSCI ACWI (Net) when growth outperforms value. However, the 12-month period was an exception due to positive selection within the IT, industrials, and consumer staples sectors. An overweight to financials and an underweight to consumer staples and materials also contributed modestly to performance. From a regional perspective, positive stock selection within the U.S., Japan, the U.K., and Ireland contributed to performance. Looking at attribution from a dividend perspective, stock selection within the low (0-3%) end of the yield spectrum contributed to relative performance. Individual positive names of note included IT companies Taiwan Semiconductor, Broadcom, and Dell Technologies; Walmart, Inc., within consumer staples; and industrials companies Hitachi, Ltd., and EMCOR Group.

High yield sleeve contributors included construction/machinery and gas distribution.

Construction/machinery and gas distribution were the sleeve's bestperforming industries during the period. By issuer, Werner FinCo, PRA Group, and Level 3 Financing contributed most. Our underweight to BBrated bonds was positive as the higher-quality segment underperformed during the trailing year.

Energy, communication services, and consumer discretionary stocks detracted from relative performance.

An overweight to energy and negative stock selection results within the energy, communication services, and consumer discretionary sectors detracted from relative performance. From a regional perspective, negative stock selection within Australia/New Zealand, Europe, and Canada detracted from relative performance. The equity sleeve was overweight to Latin America, the U.K., Ireland, and Europe, as these regions have more stocks that pay a higher dividend. However, this modest overweight to these regions detracted from performance. From a dividend perspective, an overweight to stocks with high yields (>8%) and underweight to stocks with low yields (0-1%) detracted from relative performance. Individual negative names of note included energy companies ConocoPhillips and Devon Energy; NetEase, Inc., within communication services; and Stellantis N.V. within consumer discretionary.

The option overlay is compared with the option-only returns of the U.S.-based covered call benchmarks, the Chicago Board Options Exchange (CBOE) S&P 500 Buy Write (BXM) Index and the CBOE S&P 500 2% OTM Buy Write (BXY) Index. The BXM is a benchmark index designed to track the performance of a hypothetical buywrite strategy on the S&P 500 Index. The BXY Index is a new index that uses the same methodology as BXM, but is calculated using out-of-the-money S&P 500 Index (SPX) call options, rather than at-the-money SPX call options. We adjust the benchmarks to assume 50% written on equity and report only the option return. The unadjusted BXM Index and BXY Index returned 9.70% and 14.08%, respectively, from October 31, 2023 to October 31, 2024. You cannot invest directly in an index.

Detractors within high yield included independent energy and health care.

Independent energy and health care were the worst-performing sectors within high yield. By issuer, Enviva, MultiPlan, and Bausch Health were the sleeve's worst holdings. The underweight to CCC-rated bonds and CCrated bonds was negative, as that segment of the market rallied.

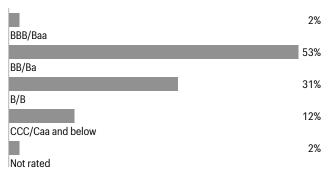

Leverage had a positive impact.

The Fund's use of leverage through bank borrowings had a positive impact on the NAV total return performance during this reporting period. As of October 31, 2024, the Fund had 16.6% leverage as a percent of total assets.

Option overlay detracted in a strong equity market.

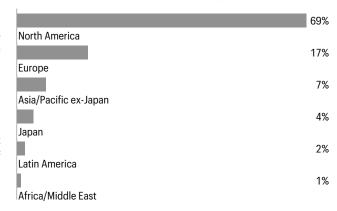

Given the strong equity performance over this time, the option overlay detracted from the Fund's relative performance. Option-implied volatility, as measured by the VIX Index,* remained relatively low for most of the 12month period. However, it increased substantially beginning in July 2024 and leading up to the U.S. election. At period-end, the VIX was at 23.16.

CREDIT QUALITY AS OF OCTOBER 31, 20241

¹ The credit quality distribution of portfolio holdings reflected in the chart is based on ratings from Standard & Poor's, Moody's Investors Service, and/or Fitch Ratings Ltd. Credit quality ratings apply to the underlying holdings of the Fund and not to the Fund itself. The percentages of the portfolio with the ratings depicted in the chart are calculated based on the market value of fixed income securities held by the Fund. If a security was rated by all three rating agencies, the middle rating was utilized. If rated by two of the three rating agencies, the lower rating was utilized, and if rated by one of the rating agencies, that rating was utilized. Standard & Poor's rates the creditworthiness of bonds, ranging from AAA (highest) to D (lowest). Ratings from A to CCC may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories. Standard & Poor's rates the creditworthiness of short-term notes from SP-1 (highest) to SP-3 (lowest). Moody's rates the creditworthiness of bonds, ranging from Aaa (highest) to C (lowest). Ratings Aa to B may be modified by the addition of a number 1 (highest) to 3 (lowest) to show relative standing within the ratings categories. Moody's rates the creditworthiness of short-term U.S. tax-exempt municipal securities from MIG 1/VMIG 1 (highest) to SG (lowest). Fitch rates the creditworthiness of bonds, ranging from AAA (highest) to D (lowest). Credit quality distribution is subject to change and may have changed since the date specified.

GEOGRAPHIC ALLOCATION AS OF OCTOBER 31, 20241

¹ Figures represent the percentage of the Fund's long-term investments. Allocations are subject to change and may have changed since the date specified.

Equity outlook: Global growth is diverging as inflation moderates and monetary policy eases.

The global monetary policy easing cycle has commenced, with September's 50-bp rate cut by the Fed paving the way for other central banks to follow suit. As we enter the final quarter of 2024, it appears that most developed economies have entered their final approach for a soft economic landing, but outcomes are diverging across regions. Continued disinflation, coupled with September's rate cuts and blockbuster jobs report, have eliminated most near-term U.S. recession risks. However, growth in the U.S. is decelerating, the eurozone is stagnant, and China continues to face real estate headwinds. U.S. gross domestic product (GDP) growth will likely continue to outperform other developed markets as global monetary policy rapidly shifts from a significant headwind into an economic tailwind.

Global equity markets have rallied as weakening inflation and economic data bolstered investors' expectations of imminent rate cuts by major central banks. The MSCI ACWI (Net) surged higher throughout most of 2024, led by large-cap, growth-oriented companies that continue to benefit from the AI theme.

After the concentrated mega-cap rally of 2023 and throughout most of 2024, we believe equity markets will likely be defined by slowing global economic growth, single-digit earnings growth, and a broadening of returns. Volatility is likely amid a highly contentious U.S. presidential election year and ongoing geopolitical tensions surrounding Ukraine, the Middle East, European elections, and Taiwan. Additionally, the Magnificent Seven stocks are coming under increasing antitrust scrutiny from regulators around the globe. Given this backdrop, we expect the fourth quarter to provide opportunities for disciplined stock selection to add value as it has thus far during 2024.

We currently anticipate volatile and range-bound markets, and we are mindful to neutralize our exposures to macroeconomic and geopolitical risks where possible. While we are generally cautious, there are potential positive catalysts from decelerating inflation, lower rates, a resilient developed labor market, improving corporate earnings, and a broadening

The Chicago Board Options Exchange (CBOE) Market Volatility Index (VIX) is a popular measure of the implied volatility of S&P 500 Index options. It represents one measure of the market's expectation of stock market volatility over the next 30-day period. You cannot invest directly in an index.

of market returns. As we monitor the macroeconomic environment, we will continue to diligently focus on company fundamentals and disciplined portfolio risk management.

The high yield outlook remains constructive.

GDP growth near 3%, declining inflation, and less-restrictive monetary policy promote accommodative financial conditions, which lead to low defaults and tight spreads. High yield issuer fundamentals remain healthy. Balance sheets and leverage ratios compare favorably to prior credit cycles. Aggressive issuance has migrated outside of the high yield universe, preventing an unhealthy buildup of risky bonds that eventually may default and cause high yield spreads to dramatically widen. Our constructive outlook on issuer fundamentals, defaults, and market

technicals outweighs our concern over tight spreads. Thus, we believe it is too early to adopt a defensive stance toward the high yield market.

The option overlay outlook is positive amid anticipated volatility.

Looking forward, we expect much of the built-up investor uncertainty in the U.S. to lessen following the U.S. election, which will drive expectations for future U.S. equity prices and volatility. However, we expect continued geopolitical concerns will lead to elevated volatility levels in the global option market. Higher levels of volatility could present a good opportunity for the Fund's option overlay strategy.

Objective, strategies and risks

Investment objective

The Fund's primary investment objective is to seek a high level of current income. The Fund's secondary objective is long-term growth of capital. The Fund's investment objectives are non-fundamental policies and may be changed by the Trustees without prior approval of the Fund's shareholders.

Principal investment strategies

The Fund allocates its assets between two separate investment strategies, or sleeves, equity and high yield. Under normal market conditions, the Fund allocates approximately 80% of its total assets to an equity sleeve comprised primarily of a diversified portfolio of common stocks of U.S. and non-U.S. companies and other equity securities that offer above-average potential for current and/or future dividends. The remaining 20% of the Fund's total assets is allocated to a sleeve consisting of below investment-grade (high yield) debt securities, loans, and preferred stocks. The Fund also employs an option strategy in an attempt to generate gains on call options written by the Fund.

Equity Sleeve. The Fund's equity sleeve invests normally in approximately 60 to 80 securities, broadly diversified among major sectors and regions. The sector and region weights are typically within +/- 5 percent of weights in the MSCI ACWI Index. Region weights are managed according to Allspring Global Investment's proprietary region classification. We target an overall portfolio dividend yield higher than that of the MSCI ACWI Index. The equity sleeve of the Fund may hold equity securities of companies of any size, including companies with large, medium, and small market capitalizations. The equity sleeve of the Fund may hold equity securities issued by domestic or foreign issuers, including emerging market issuers. The equity sleeve of the Fund will likely include primarily common stocks, although the Fund may also invest in preferred stocks, and securities convertible into or exchangeable for common stock, such as convertible preferred stocks.

Our approach is to lever the best attributes of quantitative tools and fundamental analysis. Our quantitative model casts a wide net to identify buy and sell candidates in our investment universe. Our fundamental overlay gives us the conviction that we need to build a portfolio that both targets high levels of income while still maintaining a broad-based, well-diversified exposure.

We employ a proprietary, quantitative model to evaluate all companies in the investment universe. The model draws from a factor library containing both cross-sectional and sector-specific factors. It seeks to identify companies that provide attractive dividend yields, but also have favorable quality characteristics and growth potential. The model is comprised of three unique factor groupings: valuation, quality and momentum. The valuation factors identify companies that are undervalued relative to their peers; the quality factors identify companies with strong management and profitability; and the momentum factors identify companies that have market support and positive investor sentiment. The factor composition of the model is reviewed and refreshed each quarter through a dynamic process called re-specification. The process enhances the predictive power of the model by considering recent changes in the underlying drives of stock price movement.

As previously mentioned, the investment approach combines the objectivity and repeatability of quantitative modeling with a qualitative review and validation of every stock that is added to the portfolio. The qualitative review helps us build conviction in the positions that we put into the portfolio by considering data that is more difficult to process and consume systematically in a timely fashion. We use additional sources of information such as news sentiment data, research reports, short interest data and a multitude of other resources to uncover nuances within companies that a traditional systematic strategy may not identify. Through this analysis we seek to verify that the financials driving the quantitative model reflect the true prospects of the business, identify non-quantifiable opportunities and the risks in companies, and avoid value traps (which are ever-present risk in dividend strategies).

Material Changes During the Fiscal Year ended October 31, 2024: There were no material changes to the Fund's principal investment strategy as applicable to the equity sleeve during the fiscal year ended October 31, 2024.

High Yield Sleeve. Under normal market conditions, the Fund allocates approximately 20% of its total assets to an investment strategy that focuses on U.S. dollar-denominated below investment-grade bonds (including convertible bonds), debentures, and other income obligations, including loans and preferred stocks (often called "high yield" securities or "junk bonds"). We may invest in below investment-grade debt securities of any credit quality, however, we may not purchase securities rated CCC or below if 20% of the sleeve's assets are already held with such a rating. We are not required to sell securities rated CCC or below if the 20% limit is exceeded due to security downgrades.

The sleeve will not invest more than 20% of its total assets in convertible instruments (convertible bonds and preferred stocks). The sleeve may invest up to 25% of its total assets in U.S. dollar-denominated securities of foreign issuers, excluding emerging markets securities.

For purposes of the Fund's credit quality policies, if a security receives different ratings from nationally recognized securities rating organizations, the Fund will use the rating that the portfolio managers believe is most representative of the security's credit quality. The Fund's high yield securities may have fixed or variable principal payments and all types of interest rate and dividend payment and reset terms, including fixed rate, adjustable rate, contingent, deferred, payment in kind and auction rate features. The sleeve may invest in securities with a broad range of maturities.

The Fund's high yield sleeve is managed following a rigorous investment process that emphasizes both quality and value. The research driven approach includes both a top-down review of macroeconomic factors and intensive, bottom-up scrutiny of individual securities. We consider both broad economic and issuer specific factors in selecting securities for the high yield sleeve. In assessing the appropriate maturity and duration for the Fund's high yield sleeve and the credit quality parameters and weighting objectives for each sector and industry in this portion of the Fund's portfolio, we consider a variety of factors that are expected to influence the economic environment and the dynamics of the high yield market. These factors include fundamental economic indicators, such as interest rate trends, the rates of economic growth and inflation, the performance of equity markets, commodities prices, Federal Reserve monetary policy and the relative value of the U.S. dollar compared to other currencies. Once we determine the preferable portfolio characteristics, we conduct further evaluation to determine capacity and inventory levels in each targeted industry. We also identify any circumstances that may lead to improved business conditions, thus increasing the attractiveness of a particular industry. We select individual securities based upon the terms of the securities (such as yields compared to U.S. Treasuries or comparable issues), liquidity and rating, sector and issuer diversification. We also employ due diligence and fundamental research to assess an issuer's credit quality, taking into account financial condition and profitability, future capital needs, potential for change in rating, industry outlook, the competitive environment and management ability.

The analysis of issuers may include, among other things, historic and current financial conditions, current and anticipated cash flow and borrowing requirements, value of assets in relation to historical costs, strength of management, responsiveness to business conditions, credit standing, the company's leverage versus industry norms and current and anticipated results of operations. While we consider as one factor in our credit analysis the ratings assigned by the rating services, we perform our own independent credit analysis of issuers.

In making decisions for the high yield sleeve, we rely on the knowledge, experience and judgment of our team who have access to a wide variety of research. We apply a strict sell discipline, which is as important as purchase criteria in determining the performance of this portion of this portfolio. We routinely meet to review profitability outlooks and discuss any deteriorating business fundamentals, as well as consider changes in equity valuations and market perceptions before selling securities.

We regularly review the investments of the portfolio and may sell a portfolio holding when it has achieved its valuation target, there is deterioration in the underlying fundamental of the business, or we have identified a more attractive investment opportunity.

Material Changes During the Fiscal Year ended October 31, 2024: The Fund's principal investment strategy applicable to the high yield sleeve changed during the Fiscal Year, increasing the amount the high yield sleeve may invest in U.S. dollar-denominated securities of foreign issuers, excluding emerging markets securities was from 10% limit to 25%.

Option Strategy. The Fund also employs an option strategy in an attempt to generate gains from the premiums on call options written by it on selected U.S. and non-U.S.-based securities indices, on exchange-traded funds providing returns based on certain indices, countries, or market sectors, and, to a lesser extent, on futures contracts and individual securities. The Fund may write covered call options or secured put options on individual securities and/or indexes. The Fund may also purchase call or put options.

The Fund may write call options with an aggregate net notional amount of up to 50% of the value of the equity sleeve's total assets. The extent of the Fund's use of written call options will vary over time based, in part, on our assessment of market conditions, pricing of options, related risks, and other factors. The Fund will limit option writing to an aggregate net notional amount less than the value of the Fund's equity securities in order to allow the Fund potentially to benefit from capital gains on its equity sleeve. The aggregate net notional amount of the open option positions sold by the Fund will never exceed the market value of the Fund's equity investments. For these purposes, the Fund treats options on indices as being written on securities having an aggregate value equal to the face or notional amount of the index subject to the option. At any time we may limit, or temporarily suspend, the option strategy.

We will attempt to maintain for the Fund written call option positions on equity indices whose price movements, taken in the aggregate, correlate to some degree with the price movements of some or all of the equity securities held in the Fund's equity sleeve. The Fund may write index call options that are "European style" options, meaning that the options may be exercised only on the expiration date of the option. The Fund also may write index call options that are "American style" options, meaning that the options may be exercised at any point up to and including the expiration date. The Fund expects to use primarily listed/ exchange-traded options contracts and may also use unlisted (or "over-the-counter") options.

We will actively manage the Fund's options positions using a proprietary quantitative and statistical analysis in an attempt to identify option transactions for the Fund that produce attractive current income for the Fund with appropriate limitations on the potential losses to the Fund from those transactions. We may attempt to preserve for the Fund the potential to realize a portion of any increases in the values of its portfolio securities by writing options that are out-of-the-money (that is, whose strike price is higher than the current market value or level of the underlying index), by limiting the amount of options the Fund writes, and by attempting, through use of quantitative and statistical analysis, to identify options that are likely to provide current income without undue risk of an untimely exercise.

Material Changes During the Fiscal Year ended October 31, 2024: There were no material changes to the Fund's principal investment strategy as applicable to the option sleeve during the fiscal year ended October 31, 2024.

The Fund's Overall Portfolio. We monitor the weighting of each investment strategy within the Fund's portfolio on an ongoing basis and rebalance the Fund's assets when we determine that such a rebalancing is necessary to align the portfolio in accordance with the investment strategies described above. From time to time, we may make adjustments to the weighting of each investment strategy. Such adjustments would be based on our review and

consideration of the expected returns for each investment strategy and would factor in the stock, bond and money markets, interest rate and corporate earnings growth trends, and economic conditions which support changing investment opportunities.

The Fund currently utilizes leverage principally through bank borrowings. The Fund may also enter into transactions including, among others, options, futures and forward contracts, loans of portfolio securities, swap contracts, and other derivatives, as well as when-issued, delayed delivery, or forward commitment transactions, that may in some circumstances give rise to a form of leverage. The Fund may use some or all of these transactions from time to time in the management of its portfolio, for hedging purposes, to adjust portfolio characteristics, or more generally for purposes of attempting to increase the Fund's investment return. There can be no assurance that the Fund will enter into any such transactions at any particular time or under any specific circumstances. By using leverage, the Fund seeks to obtain a higher return for holders of common shares than if it did not use leverage. Leveraging is a speculative technique, and there are special risks involved. There can be no assurance that the leveraging strategies employed by the Fund, will be successful, and such strategies can result in losses to the Fund.

The investment policies of the Fund described above are non-fundamental and may be changed by the Board of Trustees of the Fund so long as shareholders are provided with at least 60 days prior written notice of any change to the extent required by the rules under the 1940 Act.

Other investment techniques and strategies

As part of or in addition to the principal investment strategies discussed above, the Fund may at times invest a portion of its assets in the investment strategies and may use certain investment techniques as described below.

Preferred Shares. The Fund may invest in preferred shares. Preferred shares are equity securities, but they have many characteristics of fixed income securities, such as a fixed dividend payment rate and/or a liquidity preference over the issuer's common shares. However, because preferred shares are equity securities, they may be more susceptible to risks traditionally associated with equity investments than the Fund's fixed income securities.

Real Estate Investment Trusts. The Fund may invest a portion of its assets in real estate investment trusts ("REITs"). REITs primarily invest in incomeproducing real estate or real estate related loans or interests. REITs are generally classified as equity REITs, mortgage REITs, or a combination of equity and mortgage REITs. Equity REITs invest the majority of their assets directly in real property and derive income primarily from the collection of rents. Equity REITs can also realize capital gains by selling properties that have appreciated in value. Mortgage REITs invest the majority of their assets in real estate mortgages and derive income from the collection of interest payments. The Fund will indirectly bear its proportionate share of any management and other expenses paid by REITs in which it invests in addition to the expenses paid by the Fund. Distributions received by the Fund from REITs may consist of dividends, capital gains, and/or return of capital.

Loans. The high yield sleeve of the Fund may invest in direct debt instruments which are interests in amounts owed to lenders by corporate or other borrowers. The loans in which the sleeve invests primarily consist of direct obligations of a borrower. The high yield sleeve of the Fund may invest in a loan at origination as a co-lender or by acquiring in the secondary market participations in, assignments of or novations of a corporate loan. By purchasing a participation, the high yield sleeve of the Fund acquires some or all of the interest of a bank or other lending institution in a loan to a borrower. The participations typically will result in the Fund having a contractual relationship only with the lender, not the borrower. The Fund will have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the participation and only upon receipt by the lender of the payments from the borrower. Many such loans are secured, although some may be unsecured. Loans that are fully secured offer the Fund more protection than an unsecured loan in the event of non-payment of scheduled interest or principal. However, there is no assurance that the liquidation of collateral from a secured loan would satisfy the corporate borrower's obligation, or that the collateral can be liquidated. Direct debt instruments may involve a risk of loss in case of default or insolvency of the borrower and may offer less legal protection to the Fund in the event of fraud or misrepresentation. In addition, loan participations involve a risk of insolvency of the lending bank or other financial intermediary. The markets in loans are not regulated by federal securities laws or the U.S. Securities and Exchange Commission.

Asset-Backed Securities. Asset-backed securities are securities that represent a participation in, or are secured by and payable from, a stream of payments generated by particular assets, most often a pool or pools of similar assets (e.g., trade receivables). The credit quality of these securities depends primarily upon the quality of the underlying assets and the level of credit support and/or enhancement provided.

The underlying assets (e.g., loans) are subject to prepayments which shorten the securities' weighted average maturity and may lower their return. If the credit support or enhancement is exhausted, losses or delays in payment may result if the required payments of principal and interest are not made. The value of these securities also may change because of changes in the market's perception of the creditworthiness of the servicing agent for the pool, the originator of the pool, or the financial institution or Fund providing the credit support or enhancement.

Derivatives. The Fund may purchase and sell derivative instruments such as exchange-listed and over-the-counter put and call options on securities, financial futures, equity, fixed-income and interest rate indices, and other financial instruments, purchase and sell financial futures contracts and options thereon, and enter into various interest rate transactions such as swaps, caps, floors or collars. The Fund also may purchase derivative instruments that combine features of these instruments. Collectively, all of the above are referred to as "derivatives." The Fund generally seeks to use derivatives as a portfolio management or hedging technique to seek to protect against possible adverse changes in the market value of securities held in or to be purchased for the Fund's portfolio, protect the value of the Fund's portfolio, facilitate the sale of certain securities for investment purposes, manage the

effective interest rate exposure of the Fund, manage the effective maturity or duration of the Fund's portfolio, or establish positions in the derivatives markets as a temporary substitute for purchasing or selling particular securities.

The Fund may use a variety of other derivative instruments (including both long and short positions) for hedging purposes, to adjust portfolio characteristics, or more generally for purposes of attempting to increase the Fund's investment return, including, for example, buying and selling call and put options, buying and selling futures contracts and options on futures contracts, and entering into forward contracts and swap agreements with respect to securities, indices, and currencies. There can be no assurance that the Fund will enter into any such transaction at any particular time or under any specific circumstances.

With respect to the high yield sleeve, investments in derivatives are limited to 10% of the sleeve's total assets in futures and options on securities and indices and in other derivatives. In addition, the sleeve may enter into interest rate swap transactions with respect to the total amount the high yield sleeve is leveraged in order to hedge against adverse changes in interest rates affecting dividends payable on any preferred shares or interest payable on borrowings constituting leverage. In connection with any such swap transaction, the Fund will segregate liquid securities in the amount of its obligations under the transaction.

The high yield sleeve does not use derivatives as a primary investment technique and generally does not anticipate using derivatives for non-hedging purposes. In the event the sleeve uses derivatives for non-hedging purposes, no more than 3% of the sleeve's total assets will be committed to initial margin for derivatives for such purposes. The sleeve may use derivatives for a variety of purposes, including as a hedge against adverse changes in securities market prices or interest rates and as a substitute for purchasing or selling securities.

Futures Contracts. In addition to the strategies described above, the Fund may purchase or sell futures contracts on foreign securities indices and other assets. The Fund may use futures contracts for hedging purposes, to adjust portfolio characteristics, or more generally for purposes of attempting to increase the Fund's investment return.

Other Investment Companies. The Fund may invest in shares of other affiliated or unaffiliated open-end investment companies (i.e., mutual funds), closed-end funds, exchange-traded funds ("ETFs"), UCITS funds (pooled investment vehicles established in accordance with the Undertaking for Collective Investment in Transferable Securities adopted by European Union member states) and business development companies. The Fund may invest in securities of other investment companies up to the limits prescribed in Section 12(d) under the 1940 Act, the rules and regulations thereunder and any exemptive relief currently or in the future available to a Fund.

Repurchase Agreements. The Fund may enter into repurchase agreements with broker-dealers, member banks of the Federal Reserve System and other financial institutions. Repurchase agreements are arrangements under which the Fund purchases securities and the seller agrees to repurchase the securities within a specific time and at a specific price. We review and monitor the creditworthiness of any institution which enters into a repurchase agreement with the Fund. The counterparty's obligations under the repurchase agreement are collateralized with U.S. Treasury and/or agency obligations with a market value of not less than 100% of the obligations, valued daily. Collateral is held by the Fund's custodian in a segregated, safekeeping account for the benefit of the Fund. Repurchase agreements afford the Fund an opportunity to earn income on temporarily available cash at low risk. In the event that the counterparty to a repurchase agreement is unwilling or unable to fulfill its contractual obligations to repurchase the underlying security, the Fund may lose money, suffer delays, or incur costs arising from holding or selling the underlying security.

Reverse Repurchase Agreements. The Fund may enter into reverse repurchase agreements under which the Fund sells portfolio securities and agrees to repurchase them at an agreed-upon future date and price. Use of a reverse repurchase agreement may be preferable to a regular sale and later repurchase of securities, because it avoids certain market risks and transaction costs. At the time the Fund enters into a reverse repurchase agreement, it will segregate cash or other liquid assets having a value equal to or greater than the repurchase price (including accrued interest), and will subsequently monitor the account to ensure that the value of such segregated assets continues to be equal to or greater than the repurchase price. In the event that the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the Fund's use of proceeds from the agreement may be restricted pending a determination by the other party, or its trustee or receiver, whether to enforce the Fund's obligation to repurchase the securities. Reverse repurchase agreements may be viewed as a form of borrowing.

Private Placements. The Fund may invest in private placements and other "restricted" securities. Private placement securities are securities sold in offerings that are exempt from registration under the Securities Act of 1933, as amended (the "1933 Act"). They are generally eligible for sale only to certain eligible investors. Private placements often may offer attractive opportunities for investment not otherwise available on the open market. However, private placement and other restricted securities typically cannot be resold without registration under the 1933 Act or the availability of an exemption from registration (such as Rules 144A), and may not be readily marketable because they are subject to legal or contractual delays in or restrictions on resale. Because there may be relatively few potential qualified purchasers for such securities, especially under adverse market or economic conditions, or in the event of adverse changes in the financial condition of the issuer, the Fund could find it more difficult to sell such securities when it may be advisable to do so or it may be able to sell such securities only at prices lower than if such securities were more widely held and traded. Delay or difficulty in selling such securities may result in a loss to the Fund.

Securities Lending. While not currently engaged in securities lending, the Fund retains the ability to do so in order to earn additional income in the form of fees or interest on securities received as collateral or the investment of any cash received as collateral. When securities are on loan, the Fund receives

interest or dividends on those securities. In a securities lending transaction, the net asset value of the Fund is affected by an increase or decrease in the value of the securities loaned and by an increase or decrease in the value of the instrument in which collateral is invested. The amount of securities lending activity undertaken by the Fund fluctuates from time to time. The Fund has the right under the lending agreement to recover the securities from the borrower on demand. In the event of default or bankruptcy by the borrower, the Fund may be prevented from recovering the loaned securities or gaining access to the collateral or may experience delays or costs in doing so. In such an event, the terms of the agreement allows the unaffiliated securities lending agent to use the collateral to purchase replacement securities on behalf of the Fund or pay the Fund the market value of the loaned securities. The Fund bears the risk of loss with respect to depreciation of its investment of the cash collateral.

Defensive and Temporary Investments. The Fund may hold some of its assets in cash or in money market instruments, including U.S. Government obligations, shares of other mutual funds and repurchase agreements, or make other short-term investments for purposes of maintaining liquidity or for short-term defensive purposes when we believe it is in the best interests of the shareholders to do so. During these periods, the Fund may not achieve its objective.

Portfolio Turnover. It is the policy of the Fund not to engage in trading for short-term profits although portfolio turnover is not considered a limiting factor in the execution of investment decisions for the Fund.

Principal risks

An investment in the Fund may lose money, is not a deposit of a bank, is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, and is primarily subject to the risks briefly summarized below.

Market Risk. The values of, and/or the income generated by, securities held by a Fund may decline due to general market conditions or other factors, including those directly involving the issuers of such securities. Securities markets are volatile and may decline significantly in response to adverse issuer, regulatory, political, or economic developments. Different sectors of the market and different security types may react differently to such developments. Political, geopolitical, natural and other events, including war, terrorism, trade disputes, government shutdowns, market closures, inflation, natural and environmental disasters, epidemics, pandemics and other public health crises and related events have led, and in the future may lead, to economic uncertainty, decreased economic activity, increased market volatility and other disruptive effects on U.S. and global economies and markets. Such events may have significant adverse direct or indirect effects on a Fund and its investments. In addition, economies and financial markets throughout the world are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions.

Equity Securities Risk. The values of equity securities may experience periods of substantial price volatility and may decline significantly over short time periods. In general, the values of equity securities are more volatile than those of debt securities. Equity securities fluctuate in value and price in response to factors specific to the issuer of the security, such as management performance, financial condition, and market demand for the issuer's products or services, as well as factors unrelated to the fundamental condition of the issuer, including general market, economic and political conditions. Investing in equity securities poses risks specific to an issuer, as well as to the particular type of company issuing the equity securities. For example, investing in the equity securities of small- or mid-capitalization companies can involve greater risk than is customarily associated with investing in stocks of larger, more-established companies. Different parts of a market, industry and sector may react differently to adverse issuer, market, regulatory, political, and economic developments. Negative news or a poor outlook for a particular industry or sector can cause the share prices of securities of companies in that industry or sector to decline. This risk may be heightened for a Fund that invests a substantial portion of its assets in a particular industry or sector.

Foreign Investment Risk. Foreign investments may be subject to lower liquidity, greater price volatility and risks related to adverse political, regulatory, market or economic developments. Foreign companies may be subject to significantly higher levels of taxation than U.S. companies, including potentially confiscatory levels of taxation, thereby reducing the earnings potential of such foreign companies. Foreign investments may involve exposure to changes in foreign currency exchange rates. Such changes may reduce the U.S. dollar value of the investments. Foreign investments may be subject to additional risks, such as potentially higher withholding and other taxes, and may also be subject to greater trade settlement, custodial, and other operational risks than domestic investments. Certain foreign markets may also be characterized by less stringent investor protection and disclosure standards.

Debt Securities Risk. Debt securities are subject to credit risk and interest rate risk. Credit risk is the possibility that the issuer or guarantor of a debt security may be unable, or perceived to be unable or unwilling, to pay interest or repay principal when they become due. In these instances, the value of an investment could decline and the Fund could lose money. Credit risk increases as an issuer's credit quality or financial strength declines. The credit quality of a debt security may deteriorate rapidly and cause significant deterioration in the Fund's net asset value. Interest rate risk is the possibility that interest rates will change over time. When interest rates rise, the value of debt securities tends to fall. The longer the terms of the debt securities held by a Fund, the more the Fund is subject to this risk. If interest rates decline, interest that the Fund is able to earn on its investments in debt securities may also decline, which could cause the Fund to reduce the dividends it pays to shareholders, but the value of those securities may increase. Some debt securities give the issuers the option to call, redeem or prepay the securities before their maturity dates. If an issuer calls, redeems or prepays a debt security during a time of declining interest rates, the Fund might have to reinvest the proceeds in a security offering a lower yield, and therefore might not benefit from any increase in value as a result of declining interest rates. Very low or negative interest rates may magnify interest rate risk. Changing interest rates, including rates that fall below zero, may have unpredictable effects on markets, may result in heightened market volatility and may detract from Fund

performance to the extent the Fund is exposed to such interest rates. Interest rate changes and their impact on the Fund and its share price can be sudden and unpredictable. Changes in market conditions and government policies may lead to periods of heightened volatility in the debt securities market, reduced liquidity Fund investments and an increase in Fund redemptions.

High Yield Securities Risk. High yield securities and unrated securities of similar credit quality (commonly known as "junk bonds") are considered speculative and have a much greater risk of default (or in the case of bonds currently in default, of not returning principal) and their values tend to be more volatile than higher-rated securities with similar maturities. Additionally, these securities tend to be less liquid and more difficult to value than higherrated securities.

Growth/Value Investing Risk. Securities that exhibit certain characteristics, such as growth characteristics or value characteristics, tend to perform differently and shift into and out of favor with investors depending on changes in market and economic sentiment and conditions. As a result, a Fund's performance may at times be worse than the performance of other mutual funds that invest more broadly or in securities that exhibit different characteristics.

Leverage Risk. The use of leverage through the issuance of preferred shares and/or debt securities, or from borrowing money, may result in certain risks to the Fund. Leveraging is a speculative technique, and there are special risks involved, including the risk that downside outcomes for common shareholders are magnified as a result of losses and declines in value of portfolio securities purchased with borrowed money. In addition, the costs of the financial leverage may exceed the income from investments made with such leverage, interest rates or dividends payable on the financial leverage may affect the yield and distributions to the common shareholders, and the net asset value and market value of common shares may be more volatile than if the Fund had not been leveraged. The use of leverage may cause the Fund to have to liquidate portfolio positions when it may not be advantageous to do so. There can be no assurance that any leveraging strategies will be successful.

Certain transactions, such as derivatives, also may give rise to a form of economic leverage. Because many derivatives have a leverage component (i.e., a notional value in excess of the assets needed to establish and/or maintain the derivative position), adverse changes in the value or level of the underlying asset, rate or index may result in a loss substantially greater than the amount invested in the derivative itself.

Options Risk. A Fund that purchases options, which are a type of derivative, is subject to the risk that gains, if any, realized on the position, will be less than the amount paid as premiums to the writer of the option. A Fund that writes options receives a premium that may be small relative to the loss realized in the event of adverse changes in the value of the underlying instruments. A Fund that writes covered call options gives up the opportunity to profit from any price increase in the underlying security above the option exercise price while the option is in effect. Options may be more volatile than the underlying instruments. In addition, there may at times be an imperfect correlation between the movement in values of options and their underlying securities, and there may at times not be a liquid secondary market for certain options.

Quantitative Model Risk. Funds that are managed according to a quantitative model can perform differently from the market as a whole based on the factors used in the model, the weight placed on each factor and changes from the factors' historical trends. Due to the significant role technology plays in a quantitative model, use of a quantitative model carries the risk of potential issues with the design, coding, implementation or maintenance of the computer programs, data and/or other technology used in the quantitative model. These issues could negatively impact investment returns.

Anti-takeover Provisions Risk. The Fund's Agreement and Declaration of Trust and By-laws include provisions that could limit the ability of other entities or persons to acquire control of the Fund or to change the composition of its Board of Trustees. Such provisions could limit the ability of shareholders to sell their shares at a premium over prevailing market prices by discouraging a third party from seeking to obtain control of the Fund. These provisions include staggered terms of office for the Trustees, advance notice requirements for shareholder proposals, and supermajority voting requirements for open-ending the Fund or a merger, liquidation, asset sale or similar transactions.

Closed-end Fund Risk. Closed-end funds involve investment risks different from those associated with other investment companies. Shares of closedend funds frequently trade at either a premium or discount relative to their net asset value ("NAV"). There can be no assurance that the discount will decrease. It is possible that a market discount may increase and the Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities held by the Fund, thereby adversely affecting the NAV of the Fund's shares. Similarly, there can be no assurance that the Fund's shares will trade at a premium, will continue to trade at a premium or that the premium will not decrease over time. The Fund's shares are designed primarily for long-term investors, and the Fund should not be viewed as a vehicle for short-term trading purposes.

Convertible Securities Risk. A convertible security has characteristics of both equity and debt securities and, as a result, is exposed to risks that are typically associated with both types of securities. The market value of a convertible security tends to decline as interest rates increase but also tends to reflect changes in the market price of the common stock of the issuing company. A convertible security is also exposed to the risk that an issuer is unable to meet its obligation to make dividend or interest and principal payments when due as a result of changing financial or market conditions. In the event of a liquidation of the issuer, holders of a convertible security would generally be paid only after holders of any senior debt obligations. A Fund may be forced to convert a convertible security before it would otherwise choose to do so, which may decrease the Fund's return.

Derivatives Risk. The use of derivatives, such as futures, options and swap agreements, presents risks different from, and possibly greater than, the risks associated with investing directly in traditional securities. The use of derivatives can lead to losses because of adverse movements in the price or value of the derivatives' underlying assets, indexes or rates and the derivatives themselves, which may be magnified by certain features of the derivatives. These

risks are heightened when derivatives are used to enhance a Fund's return or as a substitute for a position or security, rather than solely to hedge (or mitigate) the risk of a position or security held by the Fund. The success of a derivative strategy will be affected by the portfolio manager's ability to assess and predict market or economic developments and their impact on the derivatives' underlying assets, indexes or reference rates, as well as the derivatives themselves. Certain derivative instruments may become illiquid and, as a result, may be difficult to sell when the portfolio manager believes it would be appropriate to do so. Certain derivatives create leverage, which can magnify the impact of a decline in the value of their underlying assets, indexes or reference rates, and increase the volatility of the Fund's net asset value. Certain derivatives (e.g., over-the-counter swaps) are also subject to the risk that the counterparty to the derivative contract will be unwilling or unable to fulfill its contractual obligations, which may cause a Fund to lose money, suffer delays or incur costs arising from holding or selling an underlying asset. Changes in laws or regulations may make the use of derivatives more costly, may limit the availability of derivatives, or may otherwise adversely affect the use, value or performance of derivatives.

Emerging Markets Risk. Emerging market securities typically present even greater exposure to the risks described under "Foreign Investment Risk" and may be particularly sensitive to global economic conditions. For example, emerging market countries are typically more dependent on exports and are, therefore, more vulnerable to recessions in other countries. Emerging markets tend to have less developed legal and financial systems and a smaller market capitalization than markets in developed countries. Some emerging markets are subject to greater political instability. Additionally, emerging markets may have more volatile currencies and be more sensitive than developed markets to a variety of economic factors, including inflation. Emerging market securities are also typically less liquid than securities of developed countries and could be difficult to sell, particularly during a market downturn.

Foreign Currency Risk. The Fund may invest in non-dollar-denominated investments. The Fund may be limited in its ability to hedge the value of its non-dollar denominated investments against currency fluctuations. As a result, a decline in the value of currencies in which the Fund's investments are denominated against the dollar will result in a corresponding decline in the dollar value of the Fund's assets. These declines will in turn affect the Fund's income and net asset value.

Fund Distributions Risk. The distributions shareholders receive from the Fund are based primarily on the dividends it earns from its investments in equity securities as well as the gains the Fund receives from writing options and using other derivative instruments, selling portfolio securities, and on the interest payments on debt securities held by the Fund, each of which can vary widely over the short and long term. The dividend and interest income from the Fund's investments in equity and debt securities will be influenced by both general economic activity and issuer specific factors. In the event of a recession or adverse events affecting a specific industry or issuer, an issuer of equity securities held by the Fund may reduce the dividends paid on such securities. A decline in prevailing market interest rates would likely result in a decrease in shareholders' income from the Fund. In addition, because of the variable tax treatment of the Fund's positions in options (mark-to-market treatment for gains or losses from options that qualify as "section 1256 contracts" and short-term capital gain or loss treatment generally for other options), and because of limits on the number of long-term capital gains distributions that the Fund may make in a year, distributions from the Fund may also be variable. There can be no assurance as to any level of short-term or long-term capital gains distributions or as to any ratio of quarterly distributions to capital gain distributions. Moreover, because it will not be possible to determine the nature or character of the Fund's distributions until the end of its taxable year, it is possible that a portion of the Fund's distributions may constitute returns of capital that are not currently includible in income, but that reduce a shareholder's tax basis in his or her shares. Further, certain of the Fund's call writing activities and investments in futures contracts and foreign currency contracts may affect the character, timing, and recognition of income and could cause the Fund to liquidate other investments and distribute more in gains in order to satisfy its distribution requirements.

Futures Contracts Risk. A Fund that uses futures contracts, which are a type of derivative, is subject to the risk of loss caused by unanticipated market movements. In addition, there may at times be an imperfect correlation between the movement in the prices of futures contracts and the value of their underlying instruments or indexes, and there may at times not be a liquid secondary market for certain futures contracts.

Inflation Risk. Inflation risk is the risk that the value of assets or income from the Fund's investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real, or inflation-adjusted, value of the common shares and distributions can decline and the dividend payments on the Fund's preferred shares, if any, or interest payments on Fund borrowings, if any, may increase.

Deflation Risk. Deflation risk is the risk that prices throughout the economy decline over time. Deflation may have an adverse effect on the creditworthiness of issuers and may make issuer default more likely, which may result in a decline in the value of the Fund's portfolio.

Investment Risk. An investment in the Fund is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in the Fund represents an indirect investment in the securities owned by the Fund. The value of these securities may increase or decrease, at times rapidly and unexpectedly. Your investment in the Fund may at any point in the future be worth less than your original investment even after taking into account the reinvestment of dividends and distributions.

Issuer Risk. The value of corporate income-producing securities may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's goods and services.

Loan Risk. Loans may be unrated, less liquid and more difficult to value than traditional debt securities. Loans may be made to finance highly leveraged corporate operations or acquisitions. The highly leveraged capital structure of the borrowers in such transactions may make such loans especially vulnerable to adverse changes in financial, economic or market conditions. Loans generally are subject to restrictions on transfer, and only limited opportunities may exist to sell such loans in secondary markets. As a result, a Fund may be unable to sell loans at a desired time or price. If the Fund acquires only an assignment or a participation in a loan made by a third party, the Fund may not be able to control amendments, waivers or the exercise of any remedies that a lender would have under a direct loan and may assume liability as a lender.

Management Risk. Investment decisions, techniques, analyses or models implemented by a Fund's manager or sub-adviser in seeking to achieve the Fund's investment objective may not produce the returns expected, may cause the Fund's shares to lose value or may cause the Fund to underperform other funds with similar investment objectives.

Market Price of Shares Risk. Whether investors will realize a gain or loss upon the sale of the Fund's common shares will depend upon whether the market value of the shares at the time of sale is above or below the price the investor paid, taking into account transaction costs, for the shares and is not directly dependent upon the Fund's net asset value. Because the market value of the Fund's shares will be determined by factors such as the relative demand for and supply of the shares in the market, general market conditions and other factors beyond the control of the Fund, the Fund cannot predict whether its common shares will trade at, below or above net asset value, or below or above the initial offering price for the shares.

Preferred Stock Risk. The Fund may purchase preferred stock. Preferred stock, unlike common stock, has a stated dividend rate payable from the corporation's earnings. Preferred stock dividends may be cumulative or non-cumulative, participating, or auction rate. "Cumulative" dividend provisions require all or a portion of prior unpaid dividends to be paid. If interest rates rise, the fixed dividend on preferred stocks may be less attractive, causing the price of preferred stocks to decline. Preferred stock may have mandatory sinking fund provisions, as well as call/redemption provisions prior to maturity, which can be a negative feature when interest rates decline. The rights of preferred stock on distribution of a corporation's assets in the event of a liquidation are generally subordinate to the rights associated with a corporation's debt securities.

REIT Risk. REITs involve certain unique risks in addition to those of investing in the real estate industry in general. REITs are subject to interest rate risk (especially mortgage REITs) and the risk of non-payment or default by lessees or borrowers. An equity REIT may be affected by changes in the value of the underlying properties owned by the REIT. A mortgage REIT may be affected by the ability of the issuers of its portfolio mortgages to repay their obligations. REITs whose underlying assets are concentrated in properties used by a particular industry are also subject to risks associated with such industry. REITs may have limited financial resources, may trade less frequently and in a more limited volume, and may be subject to more abrupt or erratic price movements than other types of securities. Mortgage REITs are also subject to prepayment risk—the risk that borrowers may pay off their mortgages sooner than expected, particularly when interest rates decline. This can reduce a REIT's returns to the Fund or the value of the Fund's investment in the REIT because the REIT may have to reinvest that money at lower prevailing interest rates. Dividends paid by REITs will generally not qualify for the reduced federal income tax rates applicable to qualified dividends under the Code.

Smaller Company Securities Risk. Securities of companies with smaller market capitalizations tend to be more volatile and less liquid than those of larger companies. Smaller companies may have no or relatively short operating histories, limited financial resources or may have recently become public companies. Some of these companies have aggressive capital structures, including high debt levels, or are involved in rapidly growing or changing industries and/or new technologies.

Investments in affiliates

An affiliated investment is an investment in which the Fund owns at least 5% of the outstanding voting shares of the issuer or as a result of other relationships, such as the Fund and the issuer having the same adviser or investment manager. Transactions with issuers that were affiliates of the Fund at the end of the period were as follows:

	VALUE, BEGINNING OF PERIOD	PURCHASES	SALES PROCEEDS	NET REALIZED GAINS (LOSSES)	NET CHANGE IN UNREALIZED GAINS (LOSSES)	VALUE, END OF PERIOD	SHARES, END OF PERIOD	INCOME FROM AFFILIATED SECURITIES

¹ Calculated based upon average shares outstanding

² Amount is less than \$0.005.

³ Total return is calculated assuming a purchase of common stock on the first day and a sale on the last day of the period reported. Dividends and distributions, if any, are assumed for purposes of these calculations to be reinvested at prices obtained under the Fund's Automatic Dividend Reinvestment Plan. Total return does not reflect brokerage commissions that a shareholder would pay on the purchase and sale of shares.

Notes to financial statements

1. ORGANIZATION

Allspring Global Dividend Opportunity Fund (the "Fund") was organized as a statutory trust under the laws of the state of Delaware on December 21, 2006 and is registered as a diversified closed-end management investment company under the Investment Company Act of 1940, as amended (the "1940 Act"). As an investment company, the Fund follows the accounting and reporting guidance in Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946, Financial Services – Investment Companies.

2. SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies, which are consistently followed in the preparation of the financial statements of the Fund, are in conformity with U.S. generally accepted accounting principles ("GAAP") which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Securities valuation

All investments are valued each business day as of the close of regular trading on the New York Stock Exchange (generally 4 p.m. Eastern Time), although the Fund may deviate from this calculation time under unusual or unexpected circumstances.

Equity securities and exchange-traded funds that are listed on a foreign or domestic exchange or market are valued at the official closing price or, if none, the last sales price.

The values of securities denominated in foreign currencies are translated into U.S. dollars at rates provided by an independent foreign currency pricing source at a time each business day specified by the Valuation Committee at Allspring Funds Management, LLC ("Allspring Funds Management").

Many securities markets and exchanges outside the U.S. close prior to the close of the New York Stock Exchange and therefore may not fully reflect trading or events that occur after the close of the principal exchange in which the foreign securities are traded, but before the close of the New York Stock Exchange. If such trading or events are expected to materially affect the value of such securities, then fair value pricing procedures implemented by Allspring Funds Management are applied. These procedures take into account multiple factors including movements in U.S. securities markets after foreign exchanges close. Foreign securities that are fair valued under these procedures are categorized as Level 2 and the application of these procedures may result in transfers between Level 1 and Level 2. Depending on market activity, such fair valuations may be frequent. Such fair value pricing may result in net asset values that are higher or lower than net asset values based on the last reported sales price or latest quoted bid price. On October 31, 2024, such fair value pricing was used in pricing certain foreign securities.

Debt securities are valued at the evaluated bid price provided by an independent pricing service (e.g., taking into account various factors, including yields, maturities, or credit ratings) or, if a reliable price is not available, the quoted bid price from an independent broker-dealer.

Forward foreign currency contracts are recorded at the forward rate provided by an independent foreign currency pricing source at a time each business day specified by the Valuation Committee at Allspring Funds Management.

Options that are listed on a foreign or domestic exchange or market are valued at the closing mid-price. Non-listed options are valued at the evaluated price provided by an independent pricing service or, if a reliable price is not available, the quoted bid price from an independent broker-dealer.

Investments in registered open-end investment companies (other than those listed on a foreign or domestic exchange or market) are valued at net asset value.

Investments which are not valued using the methods discussed above are valued at their fair value, as determined in good faith by Allspring Funds Management, which was named the valuation designee by the Board of Trustees. As the valuation designee, Allspring Funds Management is responsible for day-to-day valuation activities for the Allspring Funds. In connection with these responsibilities, Allspring Funds Management has established a Valuation Committee and has delegated to it the authority to take any actions regarding the valuation of portfolio securities that the Valuation Committee deems necessary or appropriate, including determining the fair value of portfolio securities. On a quarterly basis, the Board of Trustees receives reports of valuation actions taken by the Valuation Committee. On at least an annual basis, the Board of Trustees receives an assessment of the adequacy and effectiveness of Allspring Funds Management's process for determining the fair value of the portfolio of investments.

Foreign currency translation

The accounting records of the Fund are maintained in U.S. dollars. The values of other assets and liabilities denominated in foreign currencies are translated into U.S. dollars at rates provided by an independent foreign currency pricing source at a time each business day specified by the Valuation Committee. Purchases and sales of securities, and income and expenses are converted at the rate of exchange on the respective dates of such transactions. Net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually paid or received. Net unrealized foreign exchange gains and losses arise from changes in the fair value of assets and liabilities other than investments in securities resulting from changes in exchange rates. The changes in net assets arising from

changes in exchange rates of securities and the changes in net assets resulting from changes in market prices of securities are not separately presented. Such changes are included in net realized and unrealized gains or losses from investments.

When-issued transactions

The Fund may purchase securities on a forward commitment or when-issued basis. The Fund records a when-issued transaction on the trade date and will segregate assets in an amount at least equal in value to the Fund's commitment to purchase when-issued securities. Securities purchased on a when-issued basis are marked-to-market daily and the Fund begins earning interest on the settlement date. Losses may arise due to changes in the market value of the underlying securities or if the counterparty does not perform under the contract.

Loans

The Fund may invest in direct debt instruments which are interests in amounts owed to lenders by corporate or other borrowers. The loans pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. Investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties. When the Fund purchases participations, it generally has no rights to enforce compliance with the terms of the loan agreement with the borrower. As a result, the Fund assumes the credit risk of both the borrower and the lender that is selling the participation. When the Fund purchases assignments from lenders, it acquires direct rights against the borrower on the loan and may enforce compliance by the borrower with the terms of the loan agreement. Loans may include fully funded term loans or unfunded loan commitments, which are contractual obligations for future funding. Unfunded loan commitments represent the remaining obligation of the Fund to the borrower. At any point in time, up to the maturity date of the issue, the borrower may demand the unfunded portion. Unfunded amounts, if any, are marked to market and any unrealized gains or losses are recorded in the Statement of Assets and Liabilities.

Forward foreign currency contracts

A forward foreign currency contract is an agreement between two parties to purchase or sell a specific currency for an agreed-upon price at a future date. The Fund enters into forward foreign currency contracts to facilitate transactions in foreign-denominated securities and to attempt to minimize the risk to the Fund from adverse changes in the relationship between currencies. Forward foreign currency contracts are recorded at the forward rate and marked-to-market daily. When the contracts are closed, realized gains and losses arising from such transactions are recorded as realized gains or losses on forward foreign currency contracts. The Fund is subject to foreign currency risk and may be exposed to risks if the counterparties to the contracts are unable to meet the terms of their contracts or if the value of the foreign currency changes unfavorably. The Fund's maximum risk of loss from counterparty credit risk is the unrealized gains on the contracts. This risk may be mitigated if there is a master netting arrangement between the Fund and the counterparty.

Options

The Fund may write covered call options or secured put options on individual securities and/or indexes. When the Fund writes an option, an amount equal to the premium received is recorded as a liability and is subsequently adjusted to the current market value of the written option. Premiums received from written options that expire unexercised are recognized as realized gains on the expiration date. For exercised options, the difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is treated as a realized gain or loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security in calculating the realized gain or loss on the sale. If a put option is exercised, the premium reduces the cost of the security purchased. The Fund, as a writer of an option, bears the market risk of an unfavorable change in the price of the security and/or index underlying the written option.

The Fund may sell a security it does not own as a result of an exercised written call option. The Fund records the proceeds as a liability which is markedto-market daily based upon quotations from an independent pricing service or an independent broker-dealer and any change in value is recorded as an unrealized gain or loss. Any interest or dividends accrued on such securities during the period are recorded as an expense on the Statement of Operations. A gain, limited to the price at which the Fund sold the security short, or a loss, unlimited in size, will be recognized upon the closing of a short sale if the market price at the closing is less than or greater than, respectively, the proceeds originally received.

The Fund may also purchase call or put options. Premiums paid are included in the Statement of Assets and Liabilities as investments, the values of which are subsequently adjusted based on the current market values of the options. Premiums paid for purchased options that expire are recognized as realized losses on the expiration date. Premiums paid for purchased options that are exercised or closed are added to the amount paid or offset against the proceeds received for the underlying security to determine the realized gain or loss. The risk of loss associated with purchased options is limited to the premium paid.

Options traded on an exchange are regulated and terms of the options are standardized. The Fund is subject to equity price risk. Purchased options traded over-the-counter expose the Fund to counterparty risk in the event the counterparty does not perform. This risk can be mitigated by having a master netting arrangement between the Fund and the counterparty and by having the counterparty post collateral to cover the Fund's exposure to the counterparty.

Security transactions and income recognition

Securities transactions are recorded on a trade date basis. Realized gains or losses are recorded on the basis of identified cost.

Dividend income is recognized on the ex-dividend date, except for certain dividends from foreign securities, which are recorded as soon as the custodian verifies the ex-dividend date. Dividend income from foreign securities is recorded net of foreign taxes withheld where recovery of such taxes is not assured.

Interest income is accrued daily and bond discounts are accreted and premiums are amortized daily. To the extent debt obligations are placed on non-accrual status, any related interest income may be reduced by writing off interest receivables when the collection of all or a portion of interest has been determined to be doubtful based on consistently applied procedures and the fair value has decreased. If the issuer subsequently resumes interest payments or when the collectability of interest is reasonably assured, the debt obligation is removed from non-accrual status.

Interest earned on cash balances held at the custodian is recorded as interest income.

Distributions received from REIT investments may be characterized as ordinary income, capital gains, or a return of capital to the Fund based on information provided by the REIT. The proper characterization of REIT distributions is generally not known until after the end of each calendar year. As such, estimates may be used in reporting the character of income and distributions for financial statement purposes.

Distributions to shareholders

Under a managed distribution plan, the Fund pays quarterly distributions to shareholders at an annual minimum fixed rate of 9.00% based on the Fund's average monthly net asset value per share over the prior 12 months. The guarterly distributions may be sourced from income, paid-in capital, and/or capital gains, if any. To the extent that sufficient investment income is not available on a quarterly basis, the Fund may distribute long-term capital gains and/or return of capital, if any, in order to maintain its managed distribution level.

Distributions to shareholders from net investment income and net realized gains, if any, are recorded on the ex-dividend date. Such distributions are determined in accordance with income tax regulations and may differ from U.S. GAAP. Dividend sources are estimated at the time of declaration. The tax character of distributions is determined as of the Fund's fiscal year end. Therefore, a portion of the Fund's distributions made prior to the Fund's fiscal year end may be categorized as a tax return of capital at year end.

Federal and other taxes

The Fund intends to continue to qualify as a regulated investment company by distributing substantially all of its investment company taxable income and any net realized capital gains (after reduction for capital loss carryforwards) sufficient to relieve it from all, or substantially all, federal income taxes. Accordingly, no provision for federal income taxes was required.

The Fund's income and federal excise tax returns and all financial records supporting those returns for the prior three fiscal years are subject to examination by the federal and Delaware revenue authorities. Management has analyzed the Fund's tax positions taken on federal, state, and foreign tax returns, as applicable, for all open tax years and does not believe that there are any uncertain tax positions that require recognition of a tax liability.

As of October 31, 2024, the aggregate cost of all investments for federal income tax purposes was \$235,909,248 and the unrealized gains (losses) consisted of:

Gross unrealized gains \$58.125.489 Gross unrealized losses (8,784,572)

Net unrealized gains \$49,340,917

As of October 31, 2024, the Fund had capital loss carryforwards which consist of \$141,622,698 in short-term capital losses

3. FAIR VALUATION MEASUREMENTS

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund's investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The Fund's investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

- Level 1—quoted prices in active markets for identical securities
- Level 2—other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3—significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodologies used for valuing investments in securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used in valuing the Fund's assets and liabilities as of October 31, 2024:

	QUOTED PRICES (LEVEL 1)	OTHER SIGNIFICANT OBSERVABLE INPUTS (LEVEL 2)	SIGNIFICANT UNOBSERVABLE INPUTS (LEVEL 3)	TOTAL

At October 31, 2024, the Fund did not have any transfers into/out of Level 3.

4. TRANSACTIONS WITH AFFILIATES

Advisory fee

Allspring Funds Management, a wholly owned subsidiary of Allspring Global Investments Holdings, LLC, a holding company indirectly owned by certain private funds of GTCR LLC and Reverence Capital Partners, L.P., is the adviser to the Fund and is entitled to receive a fee at an annual rate of 0.85% of the Fund's average daily total assets, which is generally paid monthly. Total assets consist of the net assets of the Fund plus borrowings or other leverage for investment purposes to the extent excluded in calculating net assets.

Allspring Funds Management has retained the services of a subadvisor to provide daily portfolio management to the Fund. The fee for subadvisory services is borne by Allspring Funds Management. Allspring Global Investments, LLC, an affiliate of Allspring Funds Management and a wholly owned subsidiary of Allspring Global Investments Holdings, LLC, is the subadviser to the Fund and is entitled to receive a fee from Allspring Funds Management at an annual rate of 0.40% of the Fund's average daily total assets.

Administration fee

Allspring Funds Management also serves as the administrator to the Fund, providing the Fund with a wide range of administrative services necessary to the operation of the Fund. Allspring Funds Management is entitled to receive an annual administration fee from the Fund equal to 0.05% of the Fund's average daily total assets and generally paid monthly.

Interfund transactions

The Fund may purchase or sell portfolio investment securities to certain affiliates pursuant to Rule 17a-7 under the 1940 Act and under procedures adopted by the Board of Trustees. The procedures have been designed to ensure that these interfund transactions, which do not incur broker commissions, are effected at current market prices. Pursuant to these procedures, the Fund did not have any interfund transactions during the year ended October 31, 2024.

5. CAPITAL SHARE TRANSACTIONS

The Fund has authorized an unlimited number of shares with no par value. For the years ended October 31, 2024 and October 31, 2023, the Fund issued 0 and 14,291 shares, respectively,

Under an open-market share repurchase program (the "Buyback Program"), the Fund is authorized to repurchase up to 5% of its outstanding shares in open market transactions. The Fund's Board of Trustees has delegated to Allspring Funds Management full discretion to administer the Buyback Program including the determination of the amount and timing of repurchases in accordance with the best interests of the Fund and subject to applicable legal limitations. During the year ended October 31, 2024, the Fund repurchased 177,479 of its shares on the open market at a total cost of \$779,930 (weighted average price per share of \$4.38). The weighted average discount of these repurchased shares was 14.91%. During the year ended October 31, 2023, the Fund repurchased 27,566 of its shares on the open market at a total cost of \$105,054 (weighted average price per share of \$3.80). The weighted average discount of these repurchased shares was 15.65%.

6. BORROWINGS

The Fund has borrowed \$47,500,000 through a revolving line of credit administered by a major financial institution (the "Facility"). The Facility has a commitment amount of up to \$47,500,000. The Fund is charged interest at the 1 Month Secured Overnight Financing Rate (SOFR) plus a spread and a commitment fee based on the unutilized amount of the commitment amount. The financial institution holds a security interest in all the assets of the Fund as collateral for the borrowing. Based on the nature of the terms of the Facility and comparative market rates, the carrying amount of the borrowings at October 31, 2024 approximates its fair value. If measured at fair value, the borrowings would be categorized as a Level 2 under the fair value hierarchy.

During the year ended October 31, 2024, the Fund had average borrowings outstanding of \$47,500,000 at an average interest rate of 6.13% and recorded interest in the amount of \$2,912,001, which represents 1.26% of its average daily net assets.

7. INVESTMENT PORTFOLIO TRANSACTIONS

Purchases and sales of investments, excluding U.S. government obligations (if any) and short-term securities, for the year ended October 31, 2024 were \$204,400,508 and \$213,466,058, respectively.

8. COMMITMENTS

As of October 31, 2024, the Fund had the following unfunded loan commitments which are available until the maturity date:

Enviva Partners LP/Enviva Partners Finance Corp., 12.63%, 12-13-2024 Tranche B	\$25,065	\$126	
	UNFUNDED COMMITMENTS	UNREALIZED GAIN (LOSS)	

Based on the nature of the terms of the loans and comparative market rates, the carrying amount of the unfunded loan commitments at October 31, 2024, approximates its fair value. If measured at fair value, the unfunded loan commitments would be categorized as Level 2 under the fair value hierarchy.

9. DERIVATIVE TRANSACTIONS

During the October 31, 2024, the Fund entered into written options for income generation and hedging purposes. The Fund also entered into forward foreign currency contracts for economic hedging purposes.

The volume of the Fund's derivative activity during the October 31, 2024 was as follows:

Forward foreign currency contracts	
Average contract amounts to sell	\$43,323
Written options	
Average number of contracts written	6,474

A summary of the location of derivative instruments on the financial statements by primary risk exposure is outlined in the following table.

EQUITY RISK Liability derivatives Written options \$1,295,713

The effect of derivative instruments on the Statement of Operations for the year ended October 31, 2024 was as follows:

	EQUITY	FOREIGN CURREN	
	RISK	RISK	TOTAL
Net realized gains (losses) on derivatives			
Forward foreign currency contracts	\$ 0	\$1,859	\$ 1,859
Written options	(1,112,029) 0	(1,112,029)
	\$(1,112,029) \$1,859	\$(1,110,170)
Net change in unrealized gains (losses) on derivatives			
Written options	\$ (47,029) \$ 0	\$ (47,029)

For certain types of derivative transactions, the Fund has entered into International Swaps and Derivatives Association, Inc. master agreements ("ISDA Master Agreements") or similar agreements with approved counterparties. The ISDA Master Agreements or similar agreements may have requirements to deliver/deposit securities or cash to/with an exchange or broker-dealer as collateral and allows the Fund to offset, with each counterparty, certain derivative financial instrument's assets and/or liabilities with collateral held or pledged. Collateral requirements differ by type of derivative. Collateral or margin requirements are set by the broker or exchange clearinghouse for exchange traded derivatives while collateral terms are contract specific for over-the-counter traded derivatives. Cash collateral that has been pledged to cover obligations of the Fund under ISDA Master Agreements or similar agreements, if any, are reported separately in the Statement of Assets and Liabilities. Securities pledged as collateral, if any, are noted in the Portfolio of Investments. With respect to balance sheet offsetting, absent an event of default by the counterparty or a termination of the agreement, the reported amounts of financial assets and financial liabilities in the Statement of Assets and Liabilities are not offset across transactions between the Fund and the applicable counterparty. A reconciliation of the gross amounts on the Statement of Assets and Liabilities to the net amounts by counterparty, including any collateral exposure, for OTC derivatives is as follows:

Morgan Stanley Co.	\$1,295,713	\$0	\$(1,295,713)	\$0
COUNTERPARTY	LIABILITIES	AGREEMENTS	PLEDGED ¹	OF LIABILITIES
	ASSETS AND	NETTING	COLLATERAL	NET AMOUNT
	STATEMENT OF	SUBJECT TO		
	OF LIABILITIES IN THE	AMOUNTS		
	GROSS AMOUNTS			

¹ Collateral pledged within this table is limited to the collateral for the net transaction with the counterparty.

10. DISTRIBUTIONS TO SHAREHOLDERS

The tax character of distributions paid were as follows:

	YEAR ENDED OCTOBER 31		
	2024	2023	
Ordinary income	\$10,561,103	\$ 8,928,910	
Tax basis return of capital	8,486,870	10,388,558	
As of October 31, 2024, the components of dist	ributable earnings on a tax basis were as follows:		
UNREALIZED GAINS		CAPITAL LOSS CARRYFORWARD	
\$49,326,080		\$(141,622,698)	

11. INDEMNIFICATION

Under the Fund's organizational documents, the officers and Trustees have been granted certain indemnification rights against certain liabilities that may arise out of performance of their duties to the Fund. The Fund has entered into a separate agreement with each Trustee that converts indemnification rights currently existing under the Fund's organizational documents into contractual rights that cannot be changed in the future without the consent of the Trustee. Additionally, in the normal course of business, the Fund may enter into contracts with service providers that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated.

12. SUBSEQUENT DISTRIBUTIONS

Under the managed distribution plan, the Fund declared the following distributions to common shareholders:

DECLARATION DATE	RECORD DATE	PAYABLE DATE	PER SHARE AMOUNT
November 13, 2024	December 12, 2024	January 2, 2025	\$0.12041

To the Shareholders and Board of Trustees Allspring Global Dividend Opportunity Fund:

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of Allspring Global Dividend Opportunity Fund (the Fund), including the portfolio of investments, as of October 31, 2024, the related statements of operations and cash flows for the year then ended, the statements of changes in net assets for each of the years in the two-year period then ended, and the related notes (collectively, the financial statements) and the financial highlights for each of the years in the five-year period then ended. In our opinion, the financial statements and financial highlights present fairly, in all material respects, the financial position of the Fund as of October 31, 2024, the results of its operations and its cash flows for the year then ended, the changes in its net assets for each of the years in the two-year period then ended, and the financial highlights for each of the years in the five-year period then ended, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements and financial highlights, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements and financial highlights. Such procedures also included confirmation of securities owned as of October 31, 2024, by correspondence with the custodian, transfer agent, agent banks and brokers, or by other appropriate auditing procedures. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements and financial highlights. We believe that our audits provide a reasonable basis for our opinion.

We have not been able to determine the specific year that we began serving as the auditor of one or more Allspring Funds investment companies; however, we are aware that we have served as the auditor of one or more Allspring Funds investment companies since at least 1955.

Boston, Massachusetts December 20, 2024

Other information

Tax information

For corporate shareholders, pursuant to Section 854 of the Internal Revenue Code, 19% of ordinary income dividends qualify for the corporate dividendsreceived deduction for the fiscal year ended October 31, 2024.

Pursuant to Section 854 of the Internal Revenue Code, \$5,810,897 of income dividends paid during the fiscal year ended October 31, 2024 has been designated as qualified dividend income (QDI).

For the fiscal year ended October 31, 2024, \$1,978,095 has been designated as interest-related dividends for nonresident alien shareholders pursuant to Section 871 of the Internal Revenue Code.

Proxy voting information

A description of the policies and procedures used to determine how to vote proxies relating to portfolio securities is available without charge, upon request, by calling 1-866-259-3305, visiting our website at allspringglobal.com, or visiting the SEC website at sec.gov. Information regarding how the proxies related to portfolio securities were voted during the most recent 12-month period ended June 30 is available on the website at allspringglobal.com or by visiting the SEC website at sec.gov.

Quarterly portfolio holdings information

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year as an exhibit to its reports on Form N-PORT. Shareholders may view the filed Form N-PORT by visiting the SEC website at sec.gov.

Recent amendments to the Fund's by-laws

On December 19, 2023, with subsequent additional amendments approved April 16, 2024, the Board of Trustees of the Fund approved the adoption of Amended and Restated By-Laws of the Fund (the "By-Laws"). The By-Laws, among other things, contain modified procedural and informational requirements in connection with any advance notice of shareholder proposals or nominations, including certain information about the proponent and the proposal, or in the case of a Trustee nomination, the nominee. Any shareholder considering making a Trustee nomination or other proposal should carefully review and comply with those provisions of the By-Laws. Furthermore, in determining whether a particular nominee is qualified to serve as a Trustee, the Board has an interest in the nominee's background, skills, experience and other attributes in light of the composition of the Board. The By-Laws now include qualifications and requirements for Trustee eligibility. Additionally, the By-Laws have changed the voting standard required for election as a Trustee. The By-Laws now provide that the affirmative vote of a majority of shares outstanding and entitled to vote in an election is required to elect a Trustee in a contested election with a plurality of shares outstanding required to elect a Trustee in an uncontested election. The new voting standard will apply to all future elections of Trustees. The foregoing discussion is only a high-level summary of certain aspects of the By-Laws and is qualified in its entirety by reference to the By-Laws. Shareholders should refer to the By-Laws for more information, which can be found in a Current Report on Form 8-K filed by the Fund with the Securities and Exchange Commission (available at www.sec.gov).

Delaware statutory trust act – control share acquisitions

Because the Fund is organized as a Delaware statutory trust, it is subject to the control share acquisition statute (the "Control Share Statute") contained in Subchapter III of the Delaware Statutory Trust Act (the "DSTA"), which became automatically applicable to listed closed-end funds, such as the Fund, upon its effective date of August 1, 2022 (the "Effective Date").

The Control Share Statute provides for a series of voting power thresholds above which shares are considered control shares. The first such threshold is 10% or more, but less than 15%, of all voting power. Voting power is defined by the Control Share Statute as the power to directly or indirectly exercise or direct the exercise of the voting power of Fund shares in the election of trustees. Whether a voting power threshold is met is determined by aggregating the holdings of the acquirer as well as those of its "associates," as defined by the Control Share Statute.

Once a threshold is reached, an acquirer has no voting rights under the DSTA or the governing documents of the Fund with respect to shares acquired in excess of that threshold (i.e., the "control shares") unless approved by shareholders or exempted by the Fund's Board of Trustees. Approval by shareholders requires the affirmative vote of two-thirds of all votes entitled to be cast on the matter, excluding shares held by the acquirer and its associates as well as shares held by certain insiders of the Fund. The Control Share Statute provides procedures for an acquirer to request a shareholder meeting for the purpose of considering whether voting rights shall be accorded to control shares. Further approval by the Fund's shareholders would be required with respect to additional acquisitions of control shares above the next applicable threshold level. In addition, the Fund's Board of Trustees is permitted, but not obligated to, exempt specific acquisitions or classes of acquisitions of control shares, either in advance or retroactively.

OTHER INFORMATION (UNAUDITED)

The Control Share Statute does not retroactively apply to acquisitions of shares that occurred prior to the Effective Date. However, such shares will be aggregated with any shares acquired after the Effective Date for purposes of determining whether a voting power threshold is exceeded, resulting in the newly acquired shares constituting control shares.

The Control Share Statute requires shareholders to disclose to the Fund any control share acquisition within 10 days of such acquisition and, upon request, to provide any information that the Fund's Board of Trustees reasonably believes is necessary or desirable to determine whether a control share acquisition has occurred.

The foregoing is only a summary of certain aspects of the Control Share Statute. Shareholders should consult their own legal counsel to determine the application of the Control Share Statute with respect to their shares of the Fund and any subsequent acquisitions of shares.

Board of trustees and officers

The following table provides basic information about the Board of Trustees (the "Trustees") and Officers of the Fund. Each of the Trustees and Officers listed below acts in identical capacities for each fund in the Allspring family of funds, which consists of 92 mutual funds comprising the Allspring Funds Trust, Allspring Variable Trust, Allspring Master Trust, and four closed-end funds, including the Fund (collectively the "Fund Complex"). The mailing address of each Trustee and Officer is 1415 Vantage Park Drive, 3rd Floor, Charlotte, NC 28203. The Board of Trustees is classified into three classes of which one is elected annually. Each Trustee serves a three-year term concurrent with the class from which the Trustee is elected. Each Officer serves an indefinite term.

MATTHEW PRASSE (Born 1983)	Chief Legal Officer, since 2022; Secretary, since 2021	Managing Counsel of the Allspring Legal Department since 2023 (Senior Counsel from 2021 to 2023). Prior thereto, Senior Counsel of the Wells Fargo Legal Department from 2018 to 2021. Previously, Counsel for Barings LLC from 2015 to 2018. Prior to joining Barings, Associate at Morgan, Lewis & Bockius LLP from 2008 to 2015.

¹ For those Officers with tenures at Allspring Global Investments and/or Allspring Funds Management, LLC that began prior to 2021, such tenures include years of service during which these businesses/entities were known as Wells Fargo Asset Management and Wells Fargo Funds Management, LLC, respectively.

² Effective January 1, 2025, John Kenney will become President of the Trust and President and Chief Executive officer of Allspring Funds management, LLC.

Board consideration of investment advisory and sub-advisory agreements:

Under the Investment Company Act of 1940 (the "1940 Act"), the Board of Trustees (the "Board") of the Allspring Global Dividend Opportunity Fund (the "Fund") must determine annually whether to approve the continuation of the Fund's investment advisory and sub-advisory agreements. In this regard, at a Board meeting held on May 28-30, 2024 (the "Meeting"), the Board, all the members of which have no direct or indirect interest in the investment advisory and sub-advisory agreements and are not "interested persons" of the Fund, as defined in the 1940 Act (the "Independent Trustees"), reviewed and approved: (i) an investment advisory agreement with Allspring Funds Management, LLC ("Allspring Funds Management"); and (ii) an investment sub-advisory agreement with Allspring Global Investments, LLC (the "Sub-Adviser"), an affiliate of Allspring Funds Management. The investment advisory agreement with Allspring Funds Management and the investment sub-advisory agreement with the Sub-Adviser are collectively referred to as the "Advisory Agreements."

At the Meeting, the Board considered the factors and reached the conclusions described below relating to the selection of Allspring Funds Management and the Sub-Adviser and the approval of the Advisory Agreements. Prior to the Meeting, including at a meeting of the Board held in April 2024, and at the Meeting, the Trustees conferred extensively among themselves and with representatives of Allspring Funds Management about these matters. The Board has adopted a team-based approach, with each team consisting of a sub-set of Trustees, to assist the full Board in the discharge of its duties in reviewing investment performance and other matters throughout the year. The Independent Trustees were assisted in their evaluation of the Advisory Agreements by independent legal counsel, from whom they received separate legal advice and with whom they met separately.

In providing information to the Board, Allspring Funds Management and the Sub-Adviser were guided by a detailed set of requests for information submitted to them by independent legal counsel on behalf of the Independent Trustees at the start of the Board's annual contract renewal process earlier in 2024. In considering and approving the Advisory Agreements, the Trustees considered the information they believed relevant, including but not limited to the information discussed below. The Board considered not only the specific information presented in connection with the Meeting, but also the knowledge gained over time through interactions with Allspring Funds Management and the Sub-Adviser about various topics. In this regard, the Board reviewed reports of Allspring Funds Management at each of its quarterly meetings, which included, among other things, portfolio reviews and investment performance reports. In addition, the Board and the teams mentioned above confer with portfolio managers at various times throughout the year. The Board did not identify any particular information or consideration that was all-important or controlling, and each individual Trustee may have attributed different weights to various factors.

After its deliberations, the Board unanimously determined that the compensation payable to Allspring Funds Management and the Sub-Adviser under each of the Advisory Agreements was reasonable, and approved the continuation of the Advisory Agreements for a one-year term. The Board considered the approval of the Advisory Agreements for the Fund as part of its consideration of agreements for funds across the complex, but its approvals were made on a fund-by-fund basis. The following summarizes a number of important, but not necessarily all, factors considered by the Board in support of its approvals.

Nature, extent, and quality of services

The Board received and considered various information regarding the nature, extent and quality of services provided to the Fund by Allspring Funds Management and the Sub-Adviser under the Advisory Agreements. This information included, among other things, a summary of the background and experience of senior management of Allspring Global Investments, of which Allspring Funds Management and the Sub-Adviser are a part, and a summary of investments made in the Allspring Global Investments business.* The Board also received information about the services that continue to be provided by Wells Fargo & Co. and/or its affiliates ("Wells Fargo") since the sale of Wells Fargo Asset Management to Allspring Global Investments Holdings, LLC, a holding company indirectly owned by certain private funds of GTCR LLC and Reverence Capital Partners, L.P., under a transition services agreement and an update on the anticipated timeline for exiting the transition services agreement. In addition, the Board received and considered information about the full range of services provided to the Fund by Allspring Funds Management and its affiliates.

The Board considered the additional services provided to the Fund due to the fact that the Fund is a closed-end fund, including, but not limited to, leverage management and monitoring, evaluating, and, where appropriate, making recommendations with respect to the Fund's trading discount, share repurchase program, managed distribution program, and distribution rates, as well as shareholder relations activities.

The Board considered the qualifications, background, tenure, and responsibilities of each of the portfolio managers primarily responsible for the day-to-day portfolio management of the Fund. The Board evaluated the ability of Allspring Funds Management and the Sub-Adviser to attract and retain qualified investment professionals, including research, advisory and supervisory personnel.

The Board further considered the compliance programs and compliance records of Allspring Funds Management and the Sub-Adviser. The Board received and considered information about Allspring Global Investments' risk management functions, which included information about Allspring Funds Management's and the Sub-Adviser's business continuity plans and their approaches to data privacy and cybersecurity and Allspring Funds Management's role as fair valuation designee and derivatives risk management program manager. The Board also received and considered information about Allspring Funds Management's intermediary and vendor oversight program.

* The trade name for the asset management firm that includes Allspring Funds Management and the Sub-Adviser is "Allspring Global Investments."

Fund investment performance and expenses

The Board considered the investment performance results for the Fund over various time periods ended December 31, 2023. The Board considered these results in comparison to the investment performance of funds in a custom peer group that included funds selected by Broadridge Inc. ("Broadridge") and additional funds that were determined by Allspring Funds Management to be similar to the Fund (the "Custom Peer Group"), and in comparison to the Fund's benchmark index and to other comparative data. The Board received a description of the methodology used by Broadridge and Allspring Funds Management to select the funds in the Custom Peer Group and discussed the limitations inherent in the use of other peer Groups. The Board noted that the investment performance of the Fund was higher than the average investment performance of the Custom Peer Group for the one-, three-, and five-year periods under review, and lower than the average investment performance of the Custom Peer Group for the ten-year period. The Board also noted that the investment performance of the Fund was higher than or in range of its benchmark index, the Global Dividend Opportunity Blended Index, which is a custom index used by the Board to help it assess the Fund's relative performance, for the one-, three-, and five-year periods under review, but lower than the index for the ten-year period under review. It was noted that the Board had previously approved certain investment strategy changes for the Fund and that those changes became effective on or about April 1, 2024.

The Board also received and considered information regarding the Fund's net operating expense ratio and its various components, including actual management fees, and custodian and other non-management fees. The Board considered this ratio in comparison to the median ratio of funds in the Custom Peer Group and in comparison to the median ratio of funds in an expense group that was determined by Broadridge to be similar to the Fund (the "Broadridge Group", and together with the Custom Peer Group, the "Expense Groups"). Broadridge is an independent provider of investment company data. The Board received a description of the methodology used by Broadridge and Allspring Funds Management to select the funds in the Expense Groups, and an explanation from Broadridge of how funds comprising the Broadridge Group and their expense ratios may vary from year-to-year. Based on the Broadridge reports, the Board noted that the net operating expense ratio of the Fund was higher than the median net operating expense ratios of the Expense Groups. The Board noted that two of the funds in the Expense Groups use little leverage, and that if such peer funds were excluded from the Expense Groups, the Fund's expense ratio, including leverage costs, was equal to or below the median net operating expense ratios of the Expense Groups.

The Board took into account the Fund's investment performance and expense information provided to it among the factors considered in deciding to re-approve the Advisory Agreements.

Investment advisory and sub-advisory fee rates

The Board reviewed and considered the contractual investment advisory fee rate that is payable by the Fund to Allspring Funds Management for investment advisory services (the "Advisory Agreement Rate"), both on a stand-alone basis and on a combined basis with the Fund's contractual administration fee rate (the "Management Rate"). The Board also reviewed and considered the contractual investment sub-advisory fee rate that is payable by Allspring Funds Management to the Sub-Adviser for investment sub-advisory services (the "Sub-Advisory Agreement Rate").

Among other information reviewed by the Board was a comparison of the Management Rate of the Fund with those of other funds in the Expense Groups at a common asset level. The Board noted that the Management Rate of the Fund was in range of the average rates for its Expense Groups.

The Board also received and considered information about the portion of the total advisory fee that was retained by Allspring Funds Management after payment of the fee to the Sub-Adviser for sub-advisory services. In assessing the reasonableness of this amount, the Board received and evaluated information about the nature and extent of responsibilities retained and risks assumed by Allspring Funds Management and not delegated to or assumed by the Sub-Adviser, and about Allspring Funds Management's on-going oversight services. Given the affiliation between Allspring Funds Management and the Sub-Adviser, the Board ascribed limited relevance to the allocation of the advisory fee between them.

Based on its consideration of the factors and information it deemed relevant, including those described here, the Board determined that the Advisory Agreement Rate and the Sub-Advisory Agreement Rate were reasonable.

Profitability

The Board received and considered information concerning the profitability of Allspring Funds Management, as well as the profitability of Allspring Global Investments, from providing services to the fund complex as a whole. The Board noted that the Sub-Adviser's profitability information with respect to providing services to the Fund and other funds in the complex was subsumed in the Allspring Global Investments profitability analysis.

Allspring Funds Management reported on the methodologies and estimates used in calculating profitability, including a description of the methodology used to allocate certain expenses. Among other things, the Board noted that the levels of profitability reported on a fund-by-fund basis varied widely, depending on factors such as the size, type, and age of fund.

Based on its review, the Board did not deem the profits reported by Allspring Funds Management or Allspring Global Investments from services provided to the Fund to be at a level that would prevent it from approving the continuation of the Advisory Agreements.

Economies of scale

The Board received and considered information about the potential for Allspring Funds Management to experience economies of scale in the provision of management services, the difficulties of isolating and quantifying economies of scale on an individual fund level, and the extent to which potential scale benefits are shared with Fund shareholders. The Board noted that the Fund is not engaged in a continuous offering that could help its assets grow, and that, as is typical of closed-end funds, there are no breakpoints in the Management Rate. Although the Fund would not share in any potential economies of scale through contractual breakpoints, the Board noted that Allspring Funds Management shares potential economies of scale from its management business in a variety of ways, including through fee waiver and expense reimbursement arrangements, competitive management fee rates set at the outset without regard to breakpoints, and investments in the business intended to enhance services available to shareholders.

The Board concluded that Allspring Funds Management's arrangements with respect to the Fund constituted a reasonable approach to sharing potential economies of scale with the Fund and its shareholders. The Board also noted that it would have opportunities to revisit the Management Rate as part of future contract reviews.

Other benefits to Allspring Funds Management and the Sub-Adviser

The Board received and considered information regarding potential "fall-out" or ancillary benefits received by Allspring Funds Management and its affiliates, including the Sub-Adviser, as a result of their relationships with the Fund. Ancillary benefits could include, among others, benefits directly attributable to other relationships with the Fund and benefits potentially derived from an increase in Allspring Funds Management's and the Sub-Adviser's business as a result of their relationships with the Fund. The Board also reviewed information about soft dollar credits earned and utilized by the Sub-Adviser.

Based on its consideration of the factors and information it deemed relevant, including those described here, the Board did not find that any ancillary benefits received by Allspring Funds Management and its affiliates, including the Sub-Adviser, were unreasonable.

Conclusion

At the Meeting, after considering the above-described factors and based on its deliberations and its evaluation of the information described above, the Board unanimously determined that the compensation payable to Allspring Funds Management and the Sub-Adviser under each of the Advisory Agreements was reasonable, and approved the continuation of the Advisory Agreements for a one-year term.

Automatic dividend reinvestment plan

All common shareholders are eligible to participate in the Automatic Dividend Reinvestment Plan ("the Plan"). Pursuant to the Plan, unless a common shareholder is ineligible or elects otherwise, all cash dividends and capital gains distributions are automatically reinvested by Computershare Trust Company, N.A., as agent for shareholders in administering the Plan ("Plan Agent"), in additional common shares of the Fund. Whenever the Fund declares an ordinary income dividend or a capital gain dividend (collectively referred to as "dividends") payable either in shares or in cash, nonparticipants in the Plan will receive cash, and participants in the Plan will receive the equivalent in common shares. The shares are acquired by the Plan Agent for the participant's account, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Fund ("newly issued common shares") or (ii) by purchase of outstanding common shares on the open-market (open-market purchases) on the NYSE Amex or elsewhere. If, on the payment date for any dividend or distribution, the net asset value per share of the common shares is equal to or less than the market price per common share plus estimated brokerage commissions ("market premium"), the Plan Agent will invest the amount of such dividend or distribution in newly issued shares on behalf of the participant. The number of newly issued common shares to be credited to the participant's account will be determined by dividing the dollar amount of the dividend by the net asset value per share on the date the shares are issued, provided that the maximum discount from the then current market price per share on the date of issuance may not exceed 5%. If on the dividend payment date the net asset value per share is greater than the market value ("market discount"), the Plan Agent will invest the dividend amount in shares acquired on behalf of the participant in open-market purchases. There will be no brokerage charges with respect to shares issued directly by the Fund as a result of dividends or capital gains distributions payable either in shares or in cash. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open-market purchases in connection with the reinvestment of dividends. The automatic reinvestment of dividends and distributions will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such dividends. All correspondence concerning the Plan should be directed to the Plan Agent at P.O. Box 505000, Louisville, Kentucky 40233 or by calling 1-800-730-6001.
