

Allspring Multi-Sector Income Fund (ERC)

Annual Report

OCTOBER 31, 2024

Notice to Shareholders

- On November 14, 2024, the Fund announced a renewal of its open-market share repurchase program (the “Buyback Program”). Under the renewed Buyback Program, the Fund may repurchase up to 5% of its outstanding shares in open market transactions during the period beginning on January 1, 2025 and ending on December 31, 2025. The Fund’s Board of Trustees has delegated to Allspring Funds Management, LLC, the Fund’s adviser, discretion to administer the Buyback Program, including the determination of the amount and timing of repurchases in accordance with the best interests of the Fund and subject to applicable legal limitations.
- The Fund’s managed distribution plan provides for the declaration of monthly distributions to common shareholders of the Fund at an annual minimum fixed rate of 8.75% based on the Fund’s average monthly net asset value per share over the prior 12 months. Effective November 13, 2024, the Board approved increasing the managed distribution plan rate for Multi-Sector Income Fund from 8.00% to 8.75%. Under the managed distribution plan, monthly distributions may be sourced from income, paid-in capital, and/or capital gains, if any. To the extent that sufficient investment income is not available on a monthly basis, the Fund may distribute long-term capital gains and/or return of capital to its shareholders in order to maintain its managed distribution level. You should not draw any conclusions about the Fund’s investment performance from the amount of the Fund’s distributions or from the terms of the managed distribution plan. Shareholders may elect to reinvest distributions received pursuant to the managed distribution plan in the Fund under the existing dividend reinvestment plan, which is described later in this report.

Performance highlights

Investment objective	The Fund seeks a high level of current income consistent with limiting its overall exposure to domestic interest rate risk.
Strategy summary	The Fund allocates its assets between three separate investment strategies, or sleeves. Under normal market conditions, the Fund allocates approximately 30%-70% of its total assets to a sleeve consisting of below investment-grade (high yield) debt; approximately 10%-40% to a sleeve of foreign debt securities, including emerging market debt; and approximately 10%-30% to a sleeve of adjustable-rate and fixed-rate mortgage-backed securities, and investment-grade corporate bonds.

AVERAGE ANNUAL TOTAL RETURNS (%) AS OF OCTOBER 31, 2024¹

	1 YEAR	5 YEAR	10 YEAR
Based on market value	14.20	2.81	5.14
Based on net asset value (NAV)	15.44	3.64	4.67
Multi-Sector Income Blended Index (Strategy Benchmark) ²	13.76	2.14	3.06
Bloomberg U.S. Universal Bond Index (Regulatory Benchmark) ³	11.20	0.18	1.82

Figures quoted represent past performance, which is no guarantee of future results, and do not reflect taxes that a shareholder may pay on an investment in a fund. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted, which assumes the reinvestment of dividends and capital gains. Performance figures of the Fund do not reflect brokerage commissions that a shareholder would pay on the purchase and sale of shares. If taxes and such brokerage commissions had been reflected, performance would have been lower. To obtain performance information current to the most recent month-end, please call 1-800-222-8222.

The Fund's expense ratio for the year ended October 31, 2024, was 3.58% which includes 2.61% of interest expense.

¹ Total returns based on market value are calculated assuming a purchase of common stock on the first day and a sale on the last day of the period reported. Total returns based on NAV are calculated based on the NAV at the beginning of the period and at the end of the period. Dividends and distributions, if any, are assumed for the purposes of these calculations to be reinvested at prices obtained under the Fund's Automatic Dividend Reinvestment Plan.

GROWTH OF \$10,000 INVESTMENT AS OF OCTOBER 31, 2024¹

¹ The chart compares the performance of the Fund for the most recent ten years with the Bloomberg U.S. Universal Bond Index and Multi-Sector Income Blended Index. The chart assumes a hypothetical investment of \$10,000 investment and reflects all operating expenses of the Fund.

COMPARISON OF NAV VS. MARKET VALUE¹

¹ This chart does not reflect any brokerage commissions charged on the purchase and sale of the Fund's common shares. Dividends and distributions paid by the Fund are included in the Fund's average annual total returns but have the effect of reducing the Fund's NAV.

Risk summary

This closed-end fund is no longer available as an initial public offering and is only offered through broker-dealers on the secondary market. A closed-end fund is not required to buy its shares back from investors upon request. Shares of the Fund may trade at either a premium or discount relative to the Fund's net asset value, and there can be no assurance that any discount will decrease. The values of, and/or the income generated by, securities held by the Fund may decline due to general market conditions or other factors, including those directly involving the issuers of such securities. Debt securities are subject to credit risk and interest rate risk, and high yield securities and unrated securities of similar credit quality have a much greater risk of default and their values tend to be more volatile than higher-rated securities with similar maturities. Foreign investments may contain more risk due to the inherent risks associated with changing political climates, foreign market instability, and foreign currency fluctuations. Risks of foreign investing are magnified in emerging or developing markets. The Fund is exposed to mortgage- and asset-backed securities risk. The Fund is leveraged through a revolving credit facility and also may incur leverage by issuing preferred shares in the future. The use of leverage results in certain risks, including, among others, the likelihood of greater volatility of the net asset value and the market value of common shares. Derivatives involve additional risks, including interest rate risk, credit risk, the risk of improper valuation, and the risk of non-correlation to the relevant instruments that they are designed to hedge or closely track.

More detailed information about the Fund's investment objective, principal investment strategies and the principal risks associated with investing in the Fund can be found on page 8.

MANAGER'S DISCUSSION

Overview

The Fund's return based on market value was 14.20% for the 12-month period that ended October 31, 2024. During the same period, the Fund's return based on its net asset value (NAV) was 15.44%. Based on both its market value and its NAV return, the Fund outperformed the Multi-Sector Income Blended Index for the 12-month period.

U.S. economic growth remained healthy, rising 2.7% year over year in the period that ended September 2024, driven by personal consumption. Despite restrictive interest rates, corporate earnings saw healthy growth and layoffs remained subdued.

The Federal Open Market Committee began its rate-cutting cycle in September 2024 with a 50-basis-point (bp; 100 bps equal 1.00%) cut, ending the period at a target range of 4.75–5.00%, with expectations of an additional 100 bps of cuts to come in 2025 given the balanced risks between the Federal Reserve's (Fed's) employment and inflation mandates.

The U.S. high yield market returned 16.5% in the 12 months that ended October 2024. Financial conditions steadily eased, allowing the trailing 12-month default rate to decline to 1.3% from 2.3% and the high yield option-adjusted spread to tighten to 288 bps from 445 bps.

Global sentiment was volatile, affected by interest rate decisions, escalating geopolitical tensions, and high-profile elections. Interest rates in developed markets finally started to fall while emerging market central banks neared the end of their monetary policy easing. Bond yield volatility rose.

Spreads tightened during the 12-month period.

For the 12-month period that ended October 31, 2024, spreads (the difference in yields over Treasuries) on investment-grade corporates on average tightened 43 bps, with industrials, utilities, and financials tightening 34 bps, 42 bps, and 67 bps, respectively. Spreads in securitized sectors also compressed during the period, with esoteric (complex, non-traditional) asset-backed securities (ABS) tightening 61 bps, AAA-rated residential mortgage-backed securities (RMBS) tightening 50 bps, AAA collateralized loan obligations tightening 57 bps, and BBB-rated commercial mortgage-backed securities (CMBS) tightening more than 300 bps.

TEN LARGEST HOLDINGS (%) AS OF OCTOBER 31, 2024¹

Indonesia, 7.00%, 9-15-2030	2.65
Colombia TES, 5.75%, 11-3-2027	1.76
Hungary, 9.50%, 10-21-2026	1.58
New Zealand, 4.25%, 5-15-2034	1.37
Mexico, 7.75%, 5-29-2031	1.36
International Bank for Reconstruction & Development, 9.50%, 2-9-2029	1.29
Colombia TES, 7.75%, 9-18-2030	1.23
Romania, 7.20%, 10-30-2033	1.19
Romania, 7.35%, 4-28-2031	1.19
International Bank for Reconstruction & Development, 6.75%, 2-9-2029	1.17

¹ Figures represent the percentage of the Fund's net assets. Holdings are subject to change and may have changed since the date specified.

The mortgage/corporate sleeve positioning was adjusted slightly.

The Fund's mortgage/corporate sleeve's allocation to corporate bonds declined 2% to 42% while the allocation to securitized sectors increased from 50% to 52%. Within securitized bonds, the Fund's exposure to ABS declined 5%, while allocations to CMBS and collateralized loan obligations (CLOs) increased 6.5% and 1%, respectively.

Contributors included allocations to ABS, CMBS, RMBS, CLOs, and investment-grade credit.

Spreads compressed across most sectors over the period and the Fund's overweight allocation to securitized and corporate sectors contributed. The Fund's allocation to CMBS was among the largest contributors, while smaller allocations to RMBS and CLOs, respectively, contributed to a lesser extent. The Fund's overweight to corporate credit was also a significant contributor.

The primary detractor was a short duration position versus the benchmark.

Over the 12-month period, the mortgage/corporate sleeve was generally short duration versus the benchmark, which detracted from performance as Treasury yields rallied significantly, with the yield on the 10-year Treasury note declining 65 bps.

The international/emerging market sleeve positioning changes.

The international/emerging market sleeve underperformed its index for the 12-month period. Positioning changes within the international/emerging market sleeve were aimed at capturing shifts in relative value, reducing overall duration, and capturing higher coupon flows. We increased exposure to Asia and South Africa while reducing exposure to South America.

With regard to country positioning, allocations to South Africa, Colombia, and Hungary contributed to relative performance. Exposure to Romanian and Indian bonds were modest detractors.

Currency was a net detractor given the outperformance of the U.S. dollar, with the Brazilian real and Mexican peso struggling. There were modest positives from exposure to the South African rand, Romanian leu, and British pound. The overweight to quasi-sovereign bonds added value.

Changes to the high yield sleeve included a reduced underweight in duration.

The Fund ended the period even with the index in yield and spread after being 30 bps and 20 bps underweight, respectively, to begin the period. We reduced our duration underweight by three-tenths of a year. By sector, we increased our allocation to software/services, telecom-wireline, and health services while trimming our positions in support services, electric generation, and media content. We increased our allocation to BB-rated bonds and decreased our allocation to B-rated bonds.

CREDIT QUALITY AS OF OCTOBER 31, 2024¹

¹ The credit quality distribution of portfolio holdings reflected in the chart is based on ratings from Standard & Poor's, Moody's Investors Service, and/or Fitch Ratings Ltd. Credit quality ratings apply to the underlying holdings of the Fund and not to the Fund itself. The percentages of the portfolio with the ratings depicted in the chart are calculated based on the market value of fixed income securities held by the Fund. If a security was rated by all three rating agencies, the middle rating was utilized. If rated by two of the three rating agencies, the lower rating was utilized, and if rated by one of the three rating agencies, that rating was utilized. Standard & Poor's rates the creditworthiness of bonds, ranging from AAA (highest) to D (lowest). Ratings from A to CCC may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories. Standard & Poor's rates the creditworthiness of short-term notes from SP-1 (highest) to SP-3 (lowest). Moody's rates the creditworthiness of bonds, ranging from Aaa (highest) to C (lowest). Ratings Aa to B may be modified by the addition of a number 1 (highest) to 3 (lowest) to show relative standing within the ratings categories. Moody's rates the creditworthiness of short-term U.S. tax-exempt municipal securities from MIG 1/VMIG 1 (highest) to SG (lowest). Fitch rates the creditworthiness of bonds, ranging from AAA (highest) to D (lowest). Credit quality distribution is subject to change and may have changed since the date specified.

Contributors to high yield included construction/machinery and diversified financial services.

Construction/machinery and diversified financial services were our best-performing industries during the period. By issuer, Werner FinCo, PRA Group, and Novolex* contributed most. Our underweight to BB-rated

* This security was no longer held at the end of the reporting period.

issues was positive as the higher-quality segment underperformed during the trailing year.

Detractors included health care and independent energy.

Health care and independent energy lagged most among our sectors. By issuer, Enviva, MultiPlan, and American Beacon Advisors* were our worst-performing holdings. Our underweight to CCC-rated bonds and below was negative as that segment of the market rallied.

EFFECTIVE MATURITY DISTRIBUTION AS OF OCTOBER 31, 2024¹

¹ Figures represent the percentage of the Fund's fixed-income securities. Allocations are subject to change and may have changed since the date specified.

Leverage had a positive impact.

The Fund's use of leverage through bank borrowings had a positive impact on the NAV total return performance during this reporting period. As of October 31, 2024, the Fund had 30% leverage as a percentage of total assets.

GEOGRAPHIC ALLOCATION AS OF OCTOBER 31, 2024¹

¹ Figures represent the percentage of the Fund's long-term investments. Allocations are subject to change and may have changed since the date specified.

The outlook remains positive overall.

Gross domestic product growth near 3%, declining inflation, and less-restrictive monetary policy promote accommodative financial conditions,

which lead to low defaults and tight spreads. High yield issuer fundamentals remain healthy. Balance sheets and leverage ratios compare favorably with prior credit cycles. Aggressive issuance has migrated outside of the high yield universe, preventing an unhealthy buildup of risky bonds that eventually may default and cause high yield spreads to

dramatically widen. Our constructive outlook on issuer fundamentals, defaults, and market technical factors outweighs our concern over tight spreads. Thus, we believe it is too early to adopt a defensive stance toward the high yield market.

Objective, strategies and risks

Investment objective

The Fund seeks to provide a high level of current income consistent with limiting its overall exposure to domestic interest rate risk. The Fund's investment objective is a fundamental policy and may not be changed without the approval of a majority of the outstanding voting securities as defined in the Investment Company Act of 1940, as amended, (the "1940 Act") of the Fund.

Principal investment strategies

The Fund allocates its assets between three separate investment strategies, or sleeves.

High Yield Bond Sleeve. Under normal market conditions, the Fund allocates approximately 30%-70% of its total assets to a sleeve with an investment strategy that focuses on U.S. dollar-denominated below investment-grade bonds, debentures, and other income obligations, including loans and preferred stocks (often called "high yield" securities or "junk bonds"). We may invest in below investment-grade debt securities of any credit quality, however, we may not purchase securities rated CCC or below if 20% of the sleeve's assets are already held with such a rating. We are not required to sell securities rated CCC or below if the 20% limit is exceeded due to security downgrades. Securities in the Fund's high yield bond sleeve may be issued by domestic or foreign issuers (including foreign governments).

For purposes of the sleeve's credit quality policies, if a security receives different ratings from nationally recognized securities rating organizations, the sleeve will use the rating that the portfolio managers believe is most representative of the security's credit quality. The sleeve's high yield securities may have fixed or variable principal payments and all types of interest rate and dividend payment and reset terms, including fixed rate, adjustable rate, contingent, deferred, payment in kind and auction rate features. The sleeve may invest in securities with a broad range of maturities.

The Fund's high yield sleeve is managed following a rigorous investment process that emphasizes both quality and value. The research driven approach includes both a top-down review of macroeconomic factors and intensive, bottom-up scrutiny of individual securities. We consider both broad economic and issuer specific factors in selecting securities for the high yield sleeve. In assessing the appropriate maturity and duration for the Fund's high yield sleeve and the credit quality parameters and weighting objectives for each sector and industry in this portion of the Fund's portfolio, we consider a variety of factors that are expected to influence the economic environment and the dynamics of the high yield market. These factors include fundamental economic indicators, such as interest rate trends, the rates of economic growth and inflation, the performance of equity markets, commodities prices, Federal Reserve monetary policy and the relative value of the U.S. dollar compared to other currencies. Once we determine the preferable portfolio characteristics, we conduct further evaluation to determine capacity and inventory levels in each targeted industry. We also identify any circumstances that may lead to improved business conditions, thus increasing the attractiveness of a particular industry. We select individual securities based upon the terms of the securities (such as yields compared to U.S. Treasuries or comparable issues), liquidity and rating, sector and issuer diversification. We also employ due diligence and fundamental research to assess an issuer's credit quality, taking into account financial condition and profitability, future capital needs, potential for change in rating, industry outlook, the competitive environment and management ability.

The analysis of issuers may include, among other things, historic and current financial conditions, current and anticipated cash flow and borrowing requirements, value of assets in relation to historical costs, strength of management, responsiveness to business conditions, credit standing, the company's leverage versus industry norms and current and anticipated results of operations. While we consider as one factor in our credit analysis the ratings assigned by the rating services, we perform our own independent credit analysis of issuers.

In making decisions for the high yield sleeve, we rely on the knowledge, experience and judgment of our team who have access to a wide variety of research. We apply a strict sell discipline, which is as important as purchase criteria in determining the performance of this portion of this portfolio. We routinely meet to review profitability outlooks and discuss any deteriorating business fundamentals, as well as consider changes in equity valuations and market perceptions before selling securities.

In other than normal market conditions, when changing economic conditions and other factors cause the yield difference between lower rated and higher rated securities to narrow, the high yield bond sleeve may purchase higher rated U.S. debt instruments if we believe that the risk of loss of income and principal may be reduced substantially with only a relatively small reduction in yield.

We regularly review the investments of the portfolio and may sell a portfolio holding when it has achieved its valuation target, there is deterioration in the underlying fundamental of the business, or we have identified a more attractive investment opportunity.

Material Changes During the Fiscal Year ended October 31, 2024: There were no material changes to the Fund's principal investment strategy as applicable to the high yield bond sleeve during the fiscal year ended October 31, 2024.

International/Emerging Markets Bond Sleeve. Under normal market conditions, the Fund allocates approximately 10%-40% of its total assets to an investment strategy that focuses on developed and emerging market debt securities, including obligations of foreign governments or governmental entities, foreign corporations, or supranational agencies denominated in various currencies. Within this sleeve, the Fund invests in at least three countries or supranational agencies.

Up to 10% of the debt securities in the sleeve may be below investment grade. The weighted average credit quality of the sleeve is expected to be investment grade.

Currency is managed as a separate asset class. We may purchase a foreign currency on a spot or forward basis in order to benefit from potential appreciation of such currency relative to the U.S. dollar or to other currencies. The sleeve may enter into foreign currency exchange contracts to gain or hedge currency exposure or control risk.

While we may purchase securities of any maturity or duration, under normal circumstances, we expect this sleeve of the Fund's portfolio to maintain a dollar-weighted average effective maturity of between 5 and 14 years, and a dollar-weighted average effective duration of between 3 1/2 and 10 years. "Dollar-Weighted Average Effective Maturity" is a measure of the average time until the final payment of principal and interest is due on fixed income securities in this sleeve of the Fund. "Dollar-Weighted Average Effective Duration" is an aggregate measure of the sensitivity of a fund's fixed income portfolio securities to changes in interest rates. As a general matter, the price of a fixed income security with a longer effective duration will fluctuate more in response to changes in interest rates than the price of a fixed income security with a shorter effective duration.

We use proprietary models and systems to assess and highlight areas of relative value around the world. Model-driven forecasts are created using fundamental economic inputs to generate economic forecasts on the global bond markets. With these forecasts, an optimization process accounts for multiple iteration scenarios to create, what we believe to be, an optimal portfolio strategy. The output of the model process is intended to provide relative valuations for determining an over, or underweight of country-specific bond markets. Similarly, currencies are valued for their potential returns or to hedge currency exposure. These macro 'top-down' quantitative models are used in conjunction with our investment expertise and aligned with a 'bottom-up' security selection process. Each of our quantitative models and investment expertise are equally important in our security selection process.

Sell decisions with respect to this sleeve are valuation-driven based on our models and our fundamental analysis. We may also sell a security held by this sleeve of the Fund due to changes in portfolio strategy or cash flow needs.

Material Changes During the Fiscal Year ended October 31, 2024: There were no material changes to the Fund's principal investment strategy as applicable to the international/emerging markets bond sleeve of the Fund during the fiscal year ended October 31, 2024.

Mortgage/Corporate Bond Sleeve. Under normal market conditions, the Fund allocates approximately 10%-30% of its total assets to an investment strategy that focuses on adjustable-rate and fixed-rate mortgage backed securities (including collateralized mortgage obligations ("CMOs") and asset-backed securities) and investment grade corporate bonds. Mortgage backed securities in which the sleeve invests may include both non-agency mortgage securities and securities issued or guaranteed by the U.S. government, its agencies, or its instrumentalities. The sleeve may invest in securities with a broad range of maturities.

Under normal circumstances, we expect to maintain an average weighted credit quality rating for the sleeve of investment-grade (BBB-/Baa3 or better). As part of our mortgage-backed securities investment strategy, we may enter into dollar roll transactions for this sleeve of the Fund.

We employ a top-down, macroeconomic outlook to determine the portfolio's duration, yield curve positioning, credit quality and sector allocation. Macroeconomic factors considered may include, among others, the pace of economic growth, employment conditions, corporate profits, inflation, monetary and fiscal policy, as well as the influence of international economic and financial conditions. In combination with our top-down macroeconomic approach, we employ a bottom-up process of fundamental securities analysis to determine the specific securities for investment. Elements of this evaluation may include credit research, duration measurements, historical yield spread relationships, volatility trends, mortgage refinance rates, as well as other factors. Our credit analysis may consider an issuer's general financial condition, its competitive position and its management strategies, as well as industry characteristics and other factors. We may sell a security due to changes in credit characteristics or outlook, as well as changes in portfolio strategy or cash flow needs. A security may also be sold and replaced with one that presents a better value or risk/reward profile.

Material Changes During the Fiscal Year ended October 31, 2024: There were no material changes to the Fund's principal investment strategy as applicable to the mortgage/corporate bond sleeve of the Fund during the fiscal year ended October 31, 2024.

The Fund's Overall Portfolio. We monitor the weighting of each investment strategy within the Fund's portfolio on an ongoing basis and rebalance the Fund's assets when we determine that such a rebalancing is necessary to align the portfolio in accordance with the investment strategies described above. From time to time, we may make adjustments to the weighting of each investment strategy. Such adjustments would be based on our review and consideration of the expected returns for each investment strategy and would factor in the stock, bond and money markets, interest rate and corporate earnings growth trends, and economic conditions which support changing investment opportunities.

The Fund currently utilizes leverage principally through bank borrowings. The Fund may also enter into transactions including, among others, options, futures and forward contracts, loans of portfolio securities, swap contracts, and other derivatives, as well as when-issued, delayed delivery, or forward commitment transactions, that may in some circumstances give rise to a form of leverage. The Fund may use some or all of these transactions from time to time in the management of its portfolio, for hedging purposes, to adjust portfolio characteristics, or more generally for purposes of attempting to increase the Fund's investment return. There can be no assurance that the Fund will enter into any such transactions at any particular time or under any specific circumstances. By using leverage, the Fund seeks to obtain a higher return for holders of common shares than if it did not use leverage.

Leveraging is a speculative technique, and there are special risks involved. There can be no assurance that the leveraging strategies employed by the Fund, will be successful, and such strategies can result in losses to the Fund.

In contrast to the investment objectives of the Fund, which are fundamental, the investment policies of the Fund described above are non-fundamental and may be changed by the Board of Trustees of the Fund so long as shareholders are provided with at least 60 days prior written notice of any change to the extent required by the rules under the 1940 Act.

Other investment techniques and strategies

As part of or in addition to the principal investment strategies discussed above, the Fund may at times invest a portion of its assets in the investment strategies and may use certain investment techniques as described below.

Convertible and Other Securities. The Fund's investment in fixed income securities may include bonds and preferred stocks that are convertible into the equity securities of the issuer or a related company. The Fund will not invest more than 10% of its total assets in convertible securities. Depending upon the relationship of the conversion price to the market value of the underlying securities, convertible securities may trade more like equity securities than debt instruments. Consistent with its objective and other investment policies, the Fund may also invest a portion of its assets in equity securities, including common stocks, depositary receipts, warrants, rights and other equity interests.

Loans. The Fund may invest in direct debt instruments which are interests in amounts owed to lenders by corporate or other borrowers. The loans in which the Fund invests primarily consist of direct obligations of a borrower. The Fund may invest in a loan at origination as a co-lender or by acquiring in the secondary market participations in, assignments of or novations of a corporate loan. By purchasing a participation, the Fund acquires some or all of the interest of a bank or other lending institution in a loan to a borrower. The participations typically will result in the Fund having a contractual relationship only with the lender, not the borrower. The Fund will have the right to receive payments of principal, interest and any fees to which it is entitled only from the lender selling the participation and only upon receipt by the lender of the payments from the borrower. Many such loans are secured, although some may be unsecured. Loans that are fully secured offer the Fund more protection than an unsecured loan in the event of non-payment of scheduled interest or principal. However, there is no assurance that the liquidation of collateral from a secured loan would satisfy the corporate borrower's obligation, or that the collateral can be liquidated. Direct debt instruments may involve a risk of loss in case of default or insolvency of the borrower and may offer less legal protection to the Fund in the event of fraud or misrepresentation. In addition, loan participations involve a risk of insolvency of the lending bank or other financial intermediary. The markets in loans are not regulated by federal securities laws or the U.S. Securities and Exchange Commission.

Preferred Shares. The Fund may invest in preferred shares. Preferred shares are equity securities, but they have many characteristics of fixed income securities, such as a fixed dividend payment rate and/or a liquidity preference over the issuer's common shares. However, because preferred shares are equity securities, they may be more susceptible to risks traditionally associated with equity investments than the Fund's fixed income securities.

Foreign Currency Transactions. The Fund may engage in foreign currency transactions for the purpose of hedging against foreign exchange risk arising from the Fund's investment or anticipated investment in securities denominated in foreign currencies. The Fund also may enter into these contracts for purposes of increasing exposure to a foreign currency or to shift exposure to foreign currency fluctuations from one country to another.

Structured Securities. The Fund may invest in structured securities. The value of the principal and/or interest on such securities is determined by reference to changes in the value of specific currencies, interest rates, commodities, indices or other financial indicators ("Reference") or the relative change in two or more References. The interest rate or the principal amount payable upon maturity or redemption may be increased or decreased depending upon changes in the Reference. The terms of the structured securities may provide in certain circumstances that no principal is due at maturity and, therefore, may result in a loss of the Fund's investment. Changes in the interest rate or principal payable at maturity may be a multiple of the changes in the value of the Reference. Consequently, structured securities may entail a greater degree of market risk than other types of fixed income securities.

Asset-Backed Securities. Asset-backed securities are securities that represent a participation in, or are secured by and payable from, a stream of payments generated by particular assets, most often a pool or pools of similar assets (e.g., trade receivables). The credit quality of these securities depends primarily upon the quality of the underlying assets and the level of credit support and/or enhancement provided.

The underlying assets (e.g., loans) are subject to prepayments which shorten the securities' weighted average maturity and may lower their return. If the credit support or enhancement is exhausted, losses or delays in payment may result if the required payments of principal and interest are not made. The value of these securities also may change because of changes in the market's perception of the creditworthiness of the servicing agent for the pool, the originator of the pool, or the financial institution or Fund providing the credit support or enhancement.

Real Estate Investment Trusts. The Fund may invest a portion of its assets in real estate investment trusts ("REITs"). REITs primarily invest in income-producing real estate or real estate related loans or interests. REITs are generally classified as equity REITs, mortgage REITs, or a combination of equity and mortgage REITs. Equity REITs invest the majority of their assets directly in real property and derive income primarily from the collection of rents. Equity REITs can also realize capital gains by selling properties that have appreciated in value. Mortgage REITs invest the majority of their assets in real estate mortgages and derive income from the collection of interest payments. The Fund will indirectly bear its proportionate share of any management

and other expenses paid by REITs in which it invests in addition to the expenses paid by the Fund. Distributions received by the Fund from REITs may consist of dividends, capital gains, and/or return of capital.

U.S. Government Securities. The Fund may invest in U.S. government securities, including debt securities issued or guaranteed by the U.S. Treasury, U.S. Government agencies or government-sponsored entities. These securities may have fixed, floating or variable rate and also include mortgage-backed securities.

Zero-Coupon, Step-Up Coupon, and Pay-in-Kind Securities. Zero-coupon, step-up coupon, and pay-in-kind securities are types of debt securities that do not make regular cash interest payments. Asset-backed securities, convertible securities, corporate debt securities, foreign securities, high yield securities, mortgage-backed securities, municipal securities, participation interests, stripped securities, U.S. Government and related obligations and other types of debt instruments may be structured as zero-coupon, step-up coupon, and pay-in-kind securities.

Instead of making periodic interest payments, zero-coupon securities are sold at discounts from face value. The interest earned by the investor from holding this security to maturity is the difference between the maturity value and the purchase price. Step-up coupon bonds are debt securities that do not pay interest for a specified period of time and then, after the initial period, pay interest at a series of different rates. Pay-in-kind securities normally give the issuer an option to pay cash at a coupon payment date or to give the holder of the security a similar security with the same coupon rate and a face value equal to the amount of the coupon payment that would have been made. To the extent these securities do not pay current cash income, the market prices of these securities would generally be more volatile and likely to respond to a greater degree to changes in interest rates than the market prices of securities that pay cash interest periodically having similar maturities and credit qualities.

Investments in Equity Securities. The Fund may invest in equity securities. Equity securities, such as common stock, generally represent an ownership interest in a company. While equity securities have historically generated higher average returns than fixed income securities, equity securities have also experienced significantly more volatility in those returns. An adverse event, such as an unfavorable earnings report, may depress the value of a particular equity security held by the Fund. Also, the price of equity securities, particularly common stocks, are sensitive to general movements in the stock market. A drop in the stock market may depress the price of equity securities held by the Fund.

Other Investment Companies. The Fund may invest in other investment companies to the extent permitted under the Investment Company Act of 1940, as amended, and the rules, regulations, and exemptive orders thereunder. The Fund, as a holder of the securities of other investment companies, will bear its pro rata portion of the other investment companies' expenses, including advisory fees. These expenses are in addition to the direct expenses of the Fund's own operations.

Defensive and Temporary Investments. The Fund may hold some of its assets in cash or in money market instruments, including U.S. Government obligations, shares of other mutual funds and repurchase agreements, or make other short-term investments for purposes of maintaining liquidity or for short-term defensive purposes when we believe it is in the best interests of the shareholders to do so. During these periods, the Fund may not achieve its objective.

Derivatives. The Fund may invest up to 10% of its total assets in futures and options on securities and indices and in other derivatives. In addition, the Fund may enter into interest rate swap transactions with respect to the total amount the Fund is leveraged in order to hedge against adverse changes in interest rates affecting dividends payable on any preferred shares or interest payable on borrowings constituting leverage. In connection with any such swap transaction, the Fund will segregate liquid securities in the amount of its obligations under the transaction. A derivative is a security or instrument whose value is determined by reference to the value or the change in value of one or more securities, currencies, indices or other financial instruments. The Fund does not use derivatives as a primary investment technique and generally does not anticipate using derivatives for non-hedging purposes. In the event the Advisor uses derivatives for non-hedging purposes, no more than 3% of the Fund's total assets will be committed to initial margin for derivatives for such purposes. The Fund may use derivatives for a variety of purposes, including:

- As a hedge against adverse changes in securities market prices or interest rates; and
- As a substitute for purchasing or selling securities.

Repurchase Agreements. The Fund may enter into repurchase agreements with broker-dealers, member banks of the Federal Reserve System and other financial institutions. Repurchase agreements are arrangements under which the Fund purchases securities and the seller agrees to repurchase the securities within a specific time and at a specific price. We review and monitor the creditworthiness of any institution which enters into a repurchase agreement with the Fund. The counterparty's obligations under the repurchase agreement are collateralized with U.S. Treasury and/or agency obligations with a market value of not less than 100% of the obligations, valued daily. Collateral is held by the Fund's custodian in a segregated, safekeeping account for the benefit of the Fund. Repurchase agreements afford the Fund an opportunity to earn income on temporarily available cash at low risk. In the event that the counterparty to a repurchase agreement is unwilling or unable to fulfill its contractual obligations to repurchase the underlying security, the Fund may lose money, suffer delays, or incur costs arising from holding or selling the underlying security.

Portfolio Turnover. It is the policy of the Fund not to engage in trading for short-term profits although portfolio turnover is not considered a limiting factor in the execution of investment decisions for the Fund.

Principal risks

An investment in the Fund may lose money, is not a deposit of a bank, is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other governmental agency, and is primarily subject to the risks briefly summarized below.

Market Risk. The values of, and/or the income generated by, securities held by a Fund may decline due to general market conditions or other factors, including those directly involving the issuers of such securities. Securities markets are volatile and may decline significantly in response to adverse issuer, regulatory, political, or economic developments. Different sectors of the market and different security types may react differently to such developments. Political, geopolitical, natural and other events, including war, terrorism, trade disputes, government shutdowns, market closures, inflation, natural and environmental disasters, epidemics, pandemics and other public health crises and related events have led, and in the future may lead, to economic uncertainty, decreased economic activity, increased market volatility and other disruptive effects on U.S. and global economies and markets. Such events may have significant adverse direct or indirect effects on a Fund and its investments. In addition, economies and financial markets throughout the world are becoming increasingly interconnected, which increases the likelihood that events or conditions in one country or region will adversely impact markets or issuers in other countries or regions.

Debt Securities Risk. Debt securities are subject to credit risk and interest rate risk. Credit risk is the possibility that the issuer or guarantor of a debt security may be unable, or perceived to be unable or unwilling, to pay interest or repay principal when they become due. In these instances, the value of an investment could decline and the Fund could lose money. Credit risk increases as an issuer's credit quality or financial strength declines. The credit quality of a debt security may deteriorate rapidly and cause significant deterioration in the Fund's net asset value. Interest rate risk is the possibility that interest rates will change over time. When interest rates rise, the value of debt securities tends to fall. The longer the terms of the debt securities held by a Fund, the more the Fund is subject to this risk. If interest rates decline, interest that the Fund is able to earn on its investments in debt securities may also decline, which could cause the Fund to reduce the dividends it pays to shareholders, but the value of those securities may increase. Some debt securities give the issuers the option to call, redeem or prepay the securities before their maturity dates. If an issuer calls, redeems or prepays a debt security during a time of declining interest rates, the Fund might have to reinvest the proceeds in a security offering a lower yield, and therefore might not benefit from any increase in value as a result of declining interest rates. Very low or negative interest rates may magnify interest rate risk. Changing interest rates, including rates that fall below zero, may have unpredictable effects on markets, may result in heightened market volatility and may detract from Fund performance to the extent the Fund is exposed to such interest rates. Interest rate changes and their impact on the Fund and its share price can be sudden and unpredictable. Changes in market conditions and government policies may lead to periods of heightened volatility in the debt securities market, reduced liquidity Fund investments and an increase in Fund redemptions.

High Yield Securities Risk. High yield securities and unrated securities of similar credit quality (commonly known as "junk bonds") are considered speculative and have a much greater risk of default (or in the case of bonds currently in default, of not returning principal) and their values tend to be more volatile than higher-rated securities with similar maturities. Additionally, these securities tend to be less liquid and more difficult to value than higher-rated securities.

Foreign Investment Risk. Foreign investments may be subject to lower liquidity, greater price volatility and risks related to adverse political, regulatory, market or economic developments. Foreign companies may be subject to significantly higher levels of taxation than U.S. companies, including potentially confiscatory levels of taxation, thereby reducing the earnings potential of such foreign companies. Foreign investments may involve exposure to changes in foreign currency exchange rates. Such changes may reduce the U.S. dollar value of the investments. Foreign investments may be subject to additional risks, such as potentially higher withholding and other taxes, and may also be subject to greater trade settlement, custodial, and other operational risks than domestic investments. Certain foreign markets may also be characterized by less stringent investor protection and disclosure standards.

Emerging Markets Risk. Emerging market securities typically present even greater exposure to the risks described under "Foreign Investment Risk" and may be particularly sensitive to global economic conditions. For example, emerging market countries are typically more dependent on exports and are, therefore, more vulnerable to recessions in other countries. Emerging markets tend to have less developed legal and financial systems and a smaller market capitalization than markets in developed countries. Some emerging markets are subject to greater political instability. Additionally, emerging markets may have more volatile currencies and be more sensitive than developed markets to a variety of economic factors, including inflation. Emerging market securities are also typically less liquid than securities of developed countries and could be difficult to sell, particularly during a market downturn.

Mortgage- and Asset-Backed Securities Risk. Mortgage- and asset-backed securities are subject to risk of default on the underlying mortgages or assets, particularly during periods of economic downturn. Defaults on the underlying mortgages or assets may cause such securities to decline in value and become less liquid. Rising interest rates tend to extend the duration of these securities, making them more sensitive to changes in interest rates than instruments with fixed payment schedules. As a result, in a period of rising interest rates, these securities may exhibit additional volatility. When interest rates decline or are low, borrowers may pay off their mortgage or other debts sooner than expected, which can reduce the returns of a Fund. Funds that may enter into mortgage dollar roll transactions are subject to the risk that the market value of the securities that are required to be repurchased in the future may decline below the agreed upon repurchase price. They also involve the risk that the party to whom the securities are sold may become insolvent, limiting a Fund's ability to repurchase securities at the agreed upon price.

Leverage Risk. The use of leverage through the issuance of preferred shares and/or debt securities, or from borrowing money, may result in certain risks

to the Fund. Leveraging is a speculative technique, and there are special risks involved, including the risk that downside outcomes for common shareholders are magnified as a result of losses and declines in value of portfolio securities purchased with borrowed money. In addition, the costs of the financial leverage may exceed the income from investments made with such leverage, interest rates or dividends payable on the financial leverage may affect the yield and distributions to the common shareholders, and the net asset value and market value of common shares may be more volatile than if the Fund had not been leveraged. The use of leverage may cause the Fund to have to liquidate portfolio positions when it may not be advantageous to do so. There can be no assurance that any leveraging strategies will be successful.

Certain transactions, such as derivatives, also may give rise to a form of economic leverage. Because many derivatives have a leverage component (i.e., a notional value in excess of the assets needed to establish and/or maintain the derivative position), adverse changes in the value or level of the underlying asset, rate or index may result in a loss substantially greater than the amount invested in the derivative itself.

Anti-takeover Provisions Risk. The Fund's Agreement and Declaration of Trust and By-laws include provisions that could limit the ability of other entities or persons to acquire control of the Fund or to change the composition of its Board of Trustees. Such provisions could limit the ability of shareholders to sell their shares at a premium over prevailing market prices by discouraging a third party from seeking to obtain control of the Fund. These provisions include staggered terms of office for the Trustees, advance notice requirements for shareholder proposals, and supermajority voting requirements for open-ending the Fund or a merger, liquidation, asset sale or similar transactions.

Closed-end Fund Risk. Closed-end funds involve investment risks different from those associated with other investment companies. Shares of closed-end funds frequently trade at either a premium or discount relative to their net asset value ("NAV"). There can be no assurance that the discount will decrease. It is possible that a market discount may increase and the Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities held by the Fund, thereby adversely affecting the NAV of the Fund's shares. Similarly, there can be no assurance that the Fund's shares will trade at a premium, will continue to trade at a premium or that the premium will not decrease over time. The Fund's shares are designed primarily for long-term investors, and the Fund should not be viewed as a vehicle for short-term trading purposes.

Convertible Securities Risk. A convertible security has characteristics of both equity and debt securities and, as a result, is exposed to risks that are typically associated with both types of securities. The market value of a convertible security tends to decline as interest rates increase but also tends to reflect changes in the market price of the common stock of the issuing company. A convertible security is also exposed to the risk that an issuer is unable to meet its obligation to make dividend or interest and principal payments when due as a result of changing financial or market conditions. In the event of a liquidation of the issuer, holders of a convertible security would generally be paid only after holders of any senior debt obligations. A Fund may be forced to convert a convertible security before it would otherwise choose to do so, which may decrease the Fund's return.

Derivatives Risk. The use of derivatives, such as futures, options and swap agreements, presents risks different from, and possibly greater than, the risks associated with investing directly in traditional securities. The use of derivatives can lead to losses because of adverse movements in the price or value of the derivatives' underlying assets, indexes or rates and the derivatives themselves, which may be magnified by certain features of the derivatives. These risks are heightened when derivatives are used to enhance a Fund's return or as a substitute for a position or security, rather than solely to hedge (or mitigate) the risk of a position or security held by the Fund. The success of a derivative strategy will be affected by the portfolio manager's ability to assess and predict market or economic developments and their impact on the derivatives' underlying assets, indexes or reference rates, as well as the derivatives themselves. Certain derivative instruments may become illiquid and, as a result, may be difficult to sell when the portfolio manager believes it would be appropriate to do so. Certain derivatives create leverage, which can magnify the impact of a decline in the value of their underlying assets, indexes or reference rates, and increase the volatility of the Fund's net asset value. Certain derivatives (e.g., over-the-counter swaps) are also subject to the risk that the counterparty to the derivative contract will be unwilling or unable to fulfill its contractual obligations, which may cause a Fund to lose money, suffer delays or incur costs arising from holding or selling an underlying asset. Changes in laws or regulations may make the use of derivatives more costly, may limit the availability of derivatives, or may otherwise adversely affect the use, value or performance of derivatives.

Equity Securities Risk. The values of equity securities may experience periods of substantial price volatility and may decline significantly over short time periods. In general, the values of equity securities are more volatile than those of debt securities. Equity securities fluctuate in value and price in response to factors specific to the issuer of the security, such as management performance, financial condition, and market demand for the issuer's products or services, as well as factors unrelated to the fundamental condition of the issuer, including general market, economic and political conditions. Investing in equity securities poses risks specific to an issuer, as well as to the particular type of company issuing the equity securities. For example, investing in the equity securities of small- or mid-capitalization companies can involve greater risk than is customarily associated with investing in stocks of larger, more-established companies. Different parts of a market, industry and sector may react differently to adverse issuer, market, regulatory, political, and economic developments. Negative news or a poor outlook for a particular industry or sector can cause the share prices of securities of companies in that industry or sector to decline. This risk may be heightened for a Fund that invests a substantial portion of its assets in a particular industry or sector.

Foreign Currency Risk. The Fund may invest in non-dollar-denominated investments. The Fund may be limited in its ability to hedge the value of its non-dollar denominated investments against currency fluctuations. As a result, a decline in the value of currencies in which the Fund's investments are denominated against the dollar will result in a corresponding decline in the dollar value of the Fund's assets. These declines will in turn affect the Fund's income and net asset value.

Futures Contracts Risk. A Fund that uses futures contracts, which are a type of derivative, is subject to the risk of loss caused by unanticipated market

movements. In addition, there may at times be an imperfect correlation between the movement in the prices of futures contracts and the value of their underlying instruments or indexes, and there may at times not be a liquid secondary market for certain futures contracts.

Inflation Risk. Inflation risk is the risk that the value of assets or income from the Fund's investments will be worth less in the future as inflation decreases the value of money. As inflation increases, the real, or inflation-adjusted, value of the common shares and distributions can decline and the dividend payments on the Fund's preferred shares, if any, or interest payments on Fund borrowings, if any, may increase.

Issuer Risk. The value of corporate income-producing securities may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage and reduced demand for the issuer's goods and services.

Loan Risk. Loans may be unrated, less liquid and more difficult to value than traditional debt securities. Loans may be made to finance highly leveraged corporate operations or acquisitions. The highly leveraged capital structure of the borrowers in such transactions may make such loans especially vulnerable to adverse changes in financial, economic or market conditions. Loans generally are subject to restrictions on transfer, and only limited opportunities may exist to sell such loans in secondary markets. As a result, a Fund may be unable to sell loans at a desired time or price. If the Fund acquires only an assignment or a participation in a loan made by a third party, the Fund may not be able to control amendments, waivers or the exercise of any remedies that a lender would have under a direct loan and may assume liability as a lender.

Management Risk. Investment decisions, techniques, analyses or models implemented by a Fund's manager or sub-adviser in seeking to achieve the Fund's investment objective may not produce the returns expected, may cause the Fund's shares to lose value or may cause the Fund to underperform other funds with similar investment objectives.

Market Price of Shares Risk. Whether investors will realize a gain or loss upon the sale of the Fund's common shares will depend upon whether the market value of the shares at the time of sale is above or below the price the investor paid, taking into account transaction costs, for the shares and is not directly dependent upon the Fund's net asset value. Because the market value of the Fund's shares will be determined by factors such as the relative demand for and supply of the shares in the market, general market conditions and other factors beyond the control of the Fund, the Fund cannot predict whether its common shares will trade at, below or above net asset value, or below or above the initial offering price for the shares.

Options Risk. A Fund that purchases options, which are a type of derivative, is subject to the risk that gains, if any, realized on the position, will be less than the amount paid as premiums to the writer of the option. A Fund that writes options receives a premium that may be small relative to the loss realized in the event of adverse changes in the value of the underlying instruments. A Fund that writes covered call options gives up the opportunity to profit from any price increase in the underlying security above the option exercise price while the option is in effect. Options may be more volatile than the underlying instruments. In addition, there may at times be an imperfect correlation between the movement in values of options and their underlying securities, and there may at times not be a liquid secondary market for certain options.

Prepayment Risk. During periods of declining interest rates, the issuer of a security may exercise its option to prepay principal earlier than scheduled, forcing the Fund to reinvest in lower yielding securities. This is known as call or prepayment risk. Debt securities frequently have call features that allow the issuer to repurchase the security prior to its stated maturity. An issuer may redeem an obligation if the issuer can refinance the debt at a lower cost due to declining interest rates or an improvement in the credit standing of the issuer.

Reinvestment Risk. Reinvestment risk is the risk that income from the Fund's bond portfolio will decline if and when the Fund invests the proceeds from matured, traded or called bonds at market interest rates that are below the portfolio's current earnings rate. A decline in income could affect the common shares' market price or their overall returns.

Sovereign Debt Risk. Investments in sovereign or quasi-sovereign debt involve the risk that the governmental entities responsible for repayment will be unable or unwilling to pay interest and repay principal when due. A governmental entity's ability and willingness to pay interest and repay principal in a timely manner can be expected to be affected by a variety of factors, including its cash flow, the size of its reserves, its access to foreign exchange, the relative size of its debt service burden to its economy as a whole, and political constraints. Investments in quasi-sovereign issuers are subject to the additional risk that the issuer will default independently of its sovereign. Sovereign debt risk is greater for fixed income securities issued or guaranteed by emerging countries.

U.S. Government Obligations Risk. U.S. Government obligations may be adversely impacted by changes in interest rates, and securities issued or guaranteed by U.S. Government agencies or government-sponsored entities may not be backed by the full faith and credit of the U.S. Government. If a government-sponsored entity is unable to meet its obligations or its creditworthiness declines, the performance of a Fund that holds securities issued or guaranteed by the entity will be adversely impacted. U.S. Government obligations may be adversely affected by a default by, or decline in the credit quality, of the U.S. Government.

- ± Variable rate investment. The rate shown is the rate in effect at period end.
- f Investment in an interest-only security that entitles holders to receive only the interest payments on the underlying mortgages. The principal amount shown is the notional amount of the underlying mortgages. The rate represents the coupon rate.
- ±± The coupon of the security is adjusted based on the principal and/or interest payments received from the underlying pool of mortgages as well as the credit quality and the actual prepayment speed of the underlying mortgages. The rate shown is the rate in effect at period end.
- 144A The security may be resold in transactions exempt from registration, normally to qualified institutional buyers, pursuant to Rule 144A under the Securities Act of 1933.
- † Non-income-earning security
- ‡ Security is valued using significant unobservable inputs.
- %% The security is purchased on a when-issued basis.
- ¥ A payment-in-kind (PIK) security is a security in which the issuer may make interest or dividend payments in cash or additional securities or a combination of both. The rate shown is the rate in effect at period end.
- ∞ Security is perpetual in nature and has no stated maturity date. The date shown reflects the next call date.
- \clubsuit The issuer of the security is an affiliated person of the Fund as defined in the Investment Company Act of 1940.
- ∞ The rate represents the 7-day annualized yield at period end.
- ## All or a portion of this security is segregated for when-issued securities and unfunded loans.

Abbreviations:

Investments in affiliates

An affiliated investment is an investment in which the Fund owns at least 5% of the outstanding voting shares of the issuer or as a result of other relationships, such as the Fund and the issuer having the same adviser or investment manager. Transactions with issuers that were affiliates of the Fund at the end of the period were as follows:

	VALUE, BEGINNING OF PERIOD	PURCHASES	SALES PROCEEDS	NET REALIZED GAINS (LOSSES)	NET CHANGE IN UNREALIZED GAINS (LOSSES)	VALUE, END OF PERIOD	SHARES, END OF PERIOD	INCOME FROM AFFILIATED SECURITIES

¹ Calculated based upon average shares outstanding

² Amount is less than \$0.005.

³ Total return is calculated assuming a purchase of common stock on the first day and a sale on the last day of the period reported. Dividends and distributions, if any, are assumed for purposes of these calculations to be reinvested at prices obtained under the Fund's Automatic Dividend Reinvestment Plan. Total return does not reflect brokerage commissions that a shareholder would pay on the purchase and sale of shares.

Notes to financial statements

1. ORGANIZATION

Allspring Multi-Sector Income Fund (the “Fund”) was organized as a statutory trust under the laws of the state of Delaware on April 10, 2003 and is registered as a diversified closed-end management investment company under the Investment Company Act of 1940, as amended (the “1940 Act”). As an investment company, the Fund follows the accounting and reporting guidance in Financial Accounting Standards Board (“FASB”) Accounting Standards Codification Topic 946, *Financial Services – Investment Companies*.

2. SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies, which are consistently followed in the preparation of the financial statements of the Fund, are in conformity with U.S. generally accepted accounting principles (“GAAP”) which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Securities valuation

All investments are valued each business day as of the close of regular trading on the New York Stock Exchange (generally 4 p.m. Eastern Time), although the Fund may deviate from this calculation time under unusual or unexpected circumstances.

Debt securities are valued at the evaluated bid price provided by an independent pricing service (e.g., taking into account various factors, including yields, maturities, or credit ratings) or, if a reliable price is not available, the quoted bid price from an independent broker-dealer.

Equity securities and exchange-traded funds that are listed on a foreign or domestic exchange or market are valued at the official closing price or, if none, the last sales price.

The values of securities denominated in foreign currencies are translated into U.S. dollars at rates provided by an independent foreign currency pricing source at a time each business day specified by the Valuation Committee at Allspring Funds Management, LLC (“Allspring Funds Management”).

Investments in registered open-end investment companies (other than those listed on a foreign or domestic exchange or market) are valued at net asset value.

Investments which are not valued using the methods discussed above are valued at their fair value, as determined in good faith by Allspring Funds Management, which was named the valuation designee by the Board of Trustees. As the valuation designee, Allspring Funds Management is responsible for day-to-day valuation activities for the Allspring Funds. In connection with these responsibilities, Allspring Funds Management has established a Valuation Committee and has delegated to it the authority to take any actions regarding the valuation of portfolio securities that the Valuation Committee deems necessary or appropriate, including determining the fair value of portfolio securities. On a quarterly basis, the Board of Trustees receives reports of valuation actions taken by the Valuation Committee. On at least an annual basis, the Board of Trustees receives an assessment of the adequacy and effectiveness of Allspring Funds Management’s process for determining the fair value of the portfolio of investments.

Foreign currency translation

The accounting records of the Fund are maintained in U.S. dollars. The values of other assets and liabilities denominated in foreign currencies are translated into U.S. dollars at rates provided by an independent foreign currency pricing source at a time each business day specified by the Valuation Committee. Purchases and sales of securities, and income and expenses are converted at the rate of exchange on the respective dates of such transactions. Net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually paid or received. Net unrealized foreign exchange gains and losses arise from changes in the fair value of assets and liabilities other than investments in securities resulting from changes in exchange rates. The changes in net assets arising from changes in exchange rates of securities and the changes in net assets resulting from changes in market prices of securities are not separately presented. Such changes are included in net realized and unrealized gains or losses from investments.

When-issued transactions

The Fund may purchase securities on a forward commitment or when-issued basis. The Fund records a when-issued transaction on the trade date and will segregate assets in an amount at least equal in value to the Fund’s commitment to purchase when-issued securities. Securities purchased on a when-issued basis are marked-to-market daily and the Fund begins earning interest on the settlement date. Losses may arise due to changes in the market value of the underlying securities or if the counterparty does not perform under the contract.

Loans

The Fund may invest in direct debt instruments which are interests in amounts owed to lenders by corporate or other borrowers. The loans pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. Investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties. When the Fund purchases participations, it generally has no rights to enforce compliance with the terms of the loan agreement with the borrower. As a result, the Fund assumes the credit risk of both the borrower and the lender that is selling the

participation. When the Fund purchases assignments from lenders, it acquires direct rights against the borrower on the loan and may enforce compliance by the borrower with the terms of the loan agreement. Loans may include fully funded term loans or unfunded loan commitments, which are contractual obligations for future funding. Unfunded loan commitments represent the remaining obligation of the Fund to the borrower. At any point in time, up to the maturity date of the issue, the borrower may demand the unfunded portion. Unfunded amounts, if any, are marked to market and any unrealized gains or losses are recorded in the Statement of Assets and Liabilities.

Security transactions and income recognition

Securities transactions are recorded on a trade date basis. Realized gains or losses are recorded on the basis of identified cost.

Interest income is accrued daily and bond discounts are accreted and premiums are amortized daily. To the extent debt obligations are placed on non-accrual status, any related interest income may be reduced by writing off interest receivables when the collection of all or a portion of interest has been determined to be doubtful based on consistently applied procedures and the fair value has decreased. If the issuer subsequently resumes interest payments or when the collectability of interest is reasonably assured, the debt obligation is removed from non-accrual status. Paydown gains and losses are included in interest income.

Dividend income is recognized on the ex-dividend date.

Interest earned on cash balances held at the custodian is recorded as interest income.

Income is recorded net of foreign taxes withheld where recovery of such taxes is not assured.

Distributions to shareholders

Under a managed distribution plan, the Fund pays monthly distributions to shareholders at an annual minimum fixed rate of 8.00% based on the Fund's average monthly net asset value per share over the prior 12 months. The monthly distributions may be sourced from income, paid-in capital, and/or capital gains, if any. To the extent that sufficient investment income is not available on a monthly basis, the Fund may distribute long-term capital gains and/or return of capital, if any, in order to maintain its managed distribution level.

Distributions to shareholders from net investment income and net realized gains, if any, are recorded on the ex-dividend date. Such distributions are determined in accordance with income tax regulations and may differ from U.S. GAAP. Dividend sources are estimated at the time of declaration. The tax character of distributions is determined as of the Fund's fiscal year end. Therefore, a portion of the Fund's distributions made prior to the Fund's fiscal year end may be categorized as a tax return of capital at year end.

Federal and other taxes

The Fund intends to continue to qualify as a regulated investment company by distributing substantially all of its investment company taxable income and any net realized capital gains (after reduction for capital loss carryforwards) sufficient to relieve it from all, or substantially all, federal income taxes. Accordingly, no provision for federal income taxes was required.

The Fund's income and federal excise tax returns and all financial records supporting those returns for the prior three fiscal years are subject to examination by the federal and Delaware revenue authorities. Management has analyzed the Fund's tax positions taken on federal, state, and foreign tax returns, as applicable, for all open tax years and does not believe that there are any uncertain tax positions that require recognition of a tax liability.

As of October 31, 2024, the aggregate cost of all investments for federal income tax purposes was \$403,981,385 and the unrealized gains (losses) consisted of:

Gross unrealized gains	\$ 7,732,818
Gross unrealized losses	(15,789,955)
Net unrealized losses	\$ (8,057,137)

As of October 31, 2024, the Fund had capital loss carryforwards which consist of \$18,940,083 in short-term capital losses and \$56,802,250 in long-term capital losses.

3. FAIR VALUATION MEASUREMENTS

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund's investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). The Fund's investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

- Level 1—quoted prices in active markets for identical securities
- Level 2—other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3—significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodologies used for valuing investments in securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used in valuing the Fund's assets and liabilities as of October 31, 2024:

	QUOTED PRICES (LEVEL 1)	OTHER SIGNIFICANT OBSERVABLE INPUTS (LEVEL 2)	SIGNIFICANT UNOBSERVABLE INPUTS (LEVEL 3)	TOTAL
Assets				
Investments in:				
Agency securities	\$ 0	\$ 295,624	\$ 0	\$ 295,624

The investment types categorized above were valued using indicative broker quotes. These indicative broker quotes are considered Level 3 inputs. Quantitative unobservable inputs used by the brokers are often proprietary and not provided to the Fund and therefore the disclosure that would address these inputs is not included above.

4. TRANSACTIONS WITH AFFILIATES

Advisory fee

Allspring Funds Management, a wholly owned subsidiary of Allspring Global Investments Holdings, LLC, a holding company indirectly owned by certain private funds of GTCR LLC and Reverence Capital Partners, L.P., is the adviser to the Fund and is entitled to receive a fee at an annual rate of 0.55% of the Fund's average daily total assets, which is generally paid monthly. Total assets consist of the net assets of the Fund plus borrowings or other leverage for investment purposes to the extent excluded in calculating net assets.

Allspring Funds Management has retained the services of subadvisers to provide daily portfolio management to the Fund. The fee for subadvisory services is borne by Allspring Funds Management. Allspring Global Investments, LLC, an affiliate of Allspring Funds Management and a wholly owned subsidiary of Allspring Global Investments Holdings, LLC, is a subadviser to the Fund and is entitled to receive a fee from Allspring Funds Management at an annual rate of 0.30% of the Fund's average daily total assets. Allspring Global Investments (UK) Limited, an affiliate of Allspring Funds Management and wholly owned subsidiary of Allspring Global Investments Holdings, LLC, is also a subadviser to the Fund and is entitled to receive a fee from Allspring Funds Management at an annual rate of 0.10% of the Fund's average daily total assets.

Administration fee

Allspring Funds Management also serves as the administrator to the Fund, providing the Fund with a wide range of administrative services necessary to the operation of the Fund. Allspring Funds Management is entitled to receive an annual administration fee from the Fund equal to 0.05% of the Fund's average daily total assets and generally paid monthly.

Interfund transactions

The Fund may purchase or sell portfolio investment securities to certain affiliates pursuant to Rule 17a-7 under the 1940 Act and under procedures adopted by the Board of Trustees. The procedures have been designed to ensure that these interfund transactions, which do not incur broker commissions, are effected at current market prices. Pursuant to these procedures, the Fund did not have any interfund transactions during the year ended October 31, 2024.

5. CAPITAL SHARE TRANSACTIONS

The Fund has authorized capital of 100,000,000 shares with no par value. For the years ended October 31, 2024 and October 31, 2023, the Fund issued 0 and 18,979 shares, respectively, pursuant to the Fund's Automatic Dividend Reinvestment Plan. See "Automatic dividend reinvestment plan".

Under an open-market share repurchase program (the "Buyback Program"), the Fund is authorized to repurchase up to 5% of its outstanding shares in open market transactions. The Fund's Board of Trustees has delegated to Allspring Funds Management full discretion to administer the Buyback Program including the determination of the amount and timing of repurchases in accordance with the best interests of the Fund and subject to applicable legal limitations. During the year ended October 31, 2024, the Fund repurchased 12,490 of its shares on the open-market at a total cost of \$110,621 (weighted average price per share of \$8.84). The weighted average discount of these repurchased shares was 10.19%. During the year ended October 31, 2023, the Fund did not repurchase any of its shares under the open-market share repurchase program.

6. BORROWINGS

The Fund has borrowed \$119,000,000 through a revolving line of credit administered by a major financial institution (the "Facility"). The Facility has a commitment amount of up to \$119,000,000. The Fund is charged interest at the 1 Month Secured Overnight Financing Rate (SOFR) plus a spread and a commitment fee based on the unutilized amount of the commitment amount. The financial institution holds a security interest in all the assets of the Fund as collateral for the borrowing. Based on the nature of the terms of the Facility and comparative market rates, the carrying amount of the borrowings at October 31, 2024 approximates its fair value. If measured at fair value, the borrowings would be categorized as a Level 2 under the fair value hierarchy.

During the year ended October 31, 2024, the Fund had average borrowings outstanding of \$119,000,000 at an average interest rate of 6.13% and recorded interest in the amount of \$7,295,330, which represents 2.61% of its average daily net assets.

7. INVESTMENT PORTFOLIO TRANSACTIONS

Purchases and sales of investments, excluding U.S. government obligations (if any) and short-term securities, for the year ended October 31, 2024 were \$193,230,685 and \$174,847,838, respectively.

8. COMMITMENTS

As of October 31, 2024, the Fund had the following unfunded loan commitments which are available until the maturity date:

	UNFUNDED COMMITMENTS	UNREALIZED GAIN (LOSS)
Enviva Partners LP/Enviva Partners Finance Corp., 12.63%, 12-13-2024 Tranche B	\$99,624	\$498

Based on the nature of the terms of the loans and comparative market rates, the carrying amount of the unfunded loan commitments at October 31, 2024, approximates its fair value. If measured at fair value, the unfunded loan commitments would be categorized as Level 2 under the fair value hierarchy.

9. DISTRIBUTIONS TO SHAREHOLDERS

The tax character of distributions paid were as follows:

	YEAR ENDED OCTOBER 31	
	2024	2023
Ordinary income	\$20,816,567	\$13,814,098
Tax basis return of capital	1,236,854	9,009,943

As of October 31, 2024, the components of distributable earnings on a tax basis were as follows:

	UNREALIZED LOSSES	CAPITAL LOSS CARRYFORWARD
	\$(8,160,659)	\$(75,742,333)

10. INDEMNIFICATION

Under the Fund's organizational documents, the officers and Trustees have been granted certain indemnification rights against certain liabilities that may arise out of performance of their duties to the Fund. The Fund has entered into a separate agreement with each Trustee that converts indemnification rights currently existing under the Fund's organizational documents into contractual rights that cannot be changed in the future without the consent of the Trustee. Additionally, in the normal course of business, the Fund may enter into contracts with service providers that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated.

11. SUBSEQUENT DISTRIBUTIONS

Under the managed distribution plan, the Fund declared the following distributions to common shareholders:

DECLARATION DATE	RECORD DATE	PAYABLE DATE	PER SHARE AMOUNT
October 25, 2024	November 12, 2024	December 2, 2024	\$0.06620
November 13, 2024	December 12, 2024	January 2, 2025	0.07279

These distributions are not reflected in the accompanying financial statements.

To the Shareholders and Board of Trustees Allspring Multi-Sector Income Fund:

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities of Allspring Multi-Sector Income Fund (the Fund), including the portfolio of investments, as of October 31, 2024, the related statements of operations and cash flows for the year then ended, the statements of changes in net assets for each of the years in the two-year period then ended, and the related notes (collectively, the financial statements) and the financial highlights for each of the years in the five-year period then ended. In our opinion, the financial statements and financial highlights present fairly, in all material respects, the financial position of the Fund as of October 31, 2024, the results of its operations and its cash flows for the year then ended, the changes in its net assets for each of the years in the two-year period then ended, and the financial highlights for each of the years in the five-year period then ended, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements and financial highlights, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements and financial highlights. Such procedures also included confirmation of securities owned as of October 31, 2024, by correspondence with the custodian, transfer agents, agent banks and brokers, or by other appropriate auditing procedures. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements and financial highlights. We believe that our audits provide a reasonable basis for our opinion.

KPMG LLP

We have not been able to determine the specific year that we began serving as the auditor of one or more Allspring Funds investment companies; however, we are aware that we have served as the auditor of one or more Allspring Funds investment companies since at least 1955.

Boston, Massachusetts
December 20, 2024

Other information

Tax information

For the fiscal year ended October 31, 2024, \$10,281,837 has been designated as interest-related dividends for nonresident alien shareholders pursuant to Section 871 of the Internal Revenue Code.

Proxy voting information

A description of the policies and procedures used to determine how to vote proxies relating to portfolio securities is available without charge, upon request, by calling **1-866-259-3305**, visiting our website at **allspringglobal.com**, or visiting the SEC website at **sec.gov**. Information regarding how the proxies related to portfolio securities were voted during the most recent 12-month period ended June 30 is available on the website at **allspringglobal.com** or by visiting the SEC website at **sec.gov**.

Quarterly portfolio holdings information

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year as an exhibit to its reports on Form N-PORT. Shareholders may view the filed Form N-PORT by visiting the SEC website at **sec.gov**.

Recent amendments to the Fund's by-laws

On December 19, 2023, with subsequent additional amendments approved April 16, 2024, the Board of Trustees of the Fund approved the adoption of Amended and Restated By-Laws of the Fund (the "By-Laws"). The By-Laws, among other things, contain modified procedural and informational requirements in connection with any advance notice of shareholder proposals or nominations, including certain information about the proponent and the proposal, or in the case of a Trustee nomination, the nominee. Any shareholder considering making a Trustee nomination or other proposal should carefully review and comply with those provisions of the By-Laws. Furthermore, in determining whether a particular nominee is qualified to serve as a Trustee, the Board has an interest in the nominee's background, skills, experience and other attributes in light of the composition of the Board. The By-Laws now include qualifications and requirements for Trustee eligibility. Additionally, the By-Laws have changed the voting standard required for election as a Trustee. The By-Laws now provide that the affirmative vote of a majority of shares outstanding and entitled to vote in an election is required to elect a Trustee in a contested election with a plurality of shares outstanding required to elect a Trustee in an uncontested election. The new voting standard will apply to all future elections of Trustees. The foregoing discussion is only a high-level summary of certain aspects of the By-Laws and is qualified in its entirety by reference to the By-Laws. Shareholders should refer to the By-Laws for more information, which can be found in a Current Report on Form 8-K filed by the Fund with the Securities and Exchange Commission (available at **www.sec.gov**).

Delaware statutory trust act – control share acquisitions

Because the Fund is organized as a Delaware statutory trust, it is subject to the control share acquisition statute (the "Control Share Statute") contained in Subchapter III of the Delaware Statutory Trust Act (the "DSTA"), which became automatically applicable to listed closed-end funds, such as the Fund, upon its effective date of August 1, 2022 (the "Effective Date").

The Control Share Statute provides for a series of voting power thresholds above which shares are considered control shares. The first such threshold is 10% or more, but less than 15%, of all voting power. Voting power is defined by the Control Share Statute as the power to directly or indirectly exercise or direct the exercise of the voting power of Fund shares in the election of trustees. Whether a voting power threshold is met is determined by aggregating the holdings of the acquirer as well as those of its "associates," as defined by the Control Share Statute.

Once a threshold is reached, an acquirer has no voting rights under the DSTA or the governing documents of the Fund with respect to shares acquired in excess of that threshold (i.e., the "control shares") unless approved by shareholders or exempted by the Fund's Board of Trustees. Approval by shareholders requires the affirmative vote of two-thirds of all votes entitled to be cast on the matter, excluding shares held by the acquirer and its associates as well as shares held by certain insiders of the Fund. The Control Share Statute provides procedures for an acquirer to request a shareholder meeting for the purpose of considering whether voting rights shall be accorded to control shares. Further approval by the Fund's shareholders would be required with respect to additional acquisitions of control shares above the next applicable threshold level. In addition, the Fund's Board of Trustees is permitted, but not obligated to, exempt specific acquisitions or classes of acquisitions of control shares, either in advance or retroactively.

The Control Share Statute does not retroactively apply to acquisitions of shares that occurred prior to the Effective Date. However, such shares will be aggregated with any shares acquired after the Effective Date for purposes of determining whether a voting power threshold is exceeded, resulting in the newly acquired shares constituting control shares.

The Control Share Statute requires shareholders to disclose to the Fund any control share acquisition within 10 days of such acquisition and, upon request, to provide any information that the Fund's Board of Trustees reasonably believes is necessary or desirable to determine whether a control share acquisition has occurred.

The foregoing is only a summary of certain aspects of the Control Share Statute. Shareholders should consult their own legal counsel to determine the application of the Control Share Statute with respect to their shares of the Fund and any subsequent acquisitions of shares.

Board of trustees and officers

The following table provides basic information about the Board of Trustees (the “Trustees”) and Officers of the Fund. Each of the Trustees and Officers listed below acts in identical capacities for each fund in the Allspring family of funds, which consists of 92 mutual funds comprising the Allspring Funds Trust, Allspring Variable Trust, Allspring Master Trust, and four closed-end funds, including the Fund (collectively the “Fund Complex”). The mailing address of each Trustee and Officer is 1415 Vantage Park Drive, 3rd Floor, Charlotte, NC 28203. The Board of Trustees is classified into three classes of which one is elected annually. Each Trustee serves a three-year term concurrent with the class from which the Trustee is elected. Each Officer serves an indefinite term.

Independent Trustees

NAME AND YEAR OF BIRTH	POSITION HELD AND LENGTH OF SERVICE*	PRINCIPAL OCCUPATIONS DURING PAST FIVE YEARS OR LONGER	CURRENT OTHER PUBLIC COMPANY OR INVESTMENT COMPANY DIRECTORSHIPS

Senior Compliance Officer for the State Street divisions of Alternative Investment Solutions, Sector Solutions, and Global Marketing from 2015 to 2018. From 2010 to 2015 Vice President, Global Head of Investment and Marketing Compliance for State Street Global Advisors.
MATTHEW PRASSE (Born 1983)	Chief Legal Officer, since 2022; Secretary, since 2021	Managing Counsel of the Allspring Legal Department since 2023 (Senior Counsel from 2021 to 2023). Prior thereto, Senior Counsel of the Wells Fargo Legal Department from 2018 to 2021. Previously, Counsel for Barings LLC from 2015 to 2018. Prior to joining Barings, Associate at Morgan, Lewis & Bockius LLP from 2008 to 2015.

¹ For those Officers with tenures at Allspring Global Investments and/or Allspring Funds Management, LLC that began prior to 2021, such tenures include years of service during which these businesses/entities were known as Wells Fargo Asset Management and Wells Fargo Funds Management, LLC, respectively.

² Effective January 1, 2025, John Kenney will become President of the Trust and President and Chief Executive officer of Allspring Funds management, LLC.

Board consideration of investment advisory and sub-advisory agreements:

Under the Investment Company Act of 1940 (the “1940 Act”), the Board of Trustees (the “Board”) of the Allspring Multi-Sector Income Fund (the “Fund”) must determine annually whether to approve the continuation of the Fund’s investment advisory and sub-advisory agreements. In this regard, at a Board meeting held on May 28-30, 2024 (the “Meeting”), the Board, all the members of which have no direct or indirect interest in the investment advisory and sub-advisory agreements and are not “interested persons” of the Fund, as defined in the 1940 Act (the “Independent Trustees”), reviewed and approved: (i) an investment advisory agreement with Allspring Funds Management, LLC (“Allspring Funds Management”); and (ii) investment sub-advisory agreements with Allspring Global Investments, LLC and Allspring Global Investments (UK) Limited (the “Sub-Advisers”), affiliates of Allspring Funds Management. The investment advisory agreement with Allspring Funds Management and the investment sub-advisory agreements with the Sub-Advisers are collectively referred to as the “Advisory Agreements.”

At the Meeting, the Board considered the factors and reached the conclusions described below relating to the selection of Allspring Funds Management and the Sub-Advisers and the approval of the Advisory Agreements. Prior to the Meeting, including at a meeting of the Board held in April 2024, and at the Meeting, the Trustees conferred extensively among themselves and with representatives of Allspring Funds Management about these matters. The Board has adopted a team-based approach, with each team consisting of a sub-set of Trustees, to assist the full Board in the discharge of its duties in reviewing investment performance and other matters throughout the year. The Independent Trustees were assisted in their evaluation of the Advisory Agreements by independent legal counsel, from whom they received separate legal advice and with whom they met separately.

In providing information to the Board, Allspring Funds Management and the Sub-Advisers were guided by a detailed set of requests for information submitted to them by independent legal counsel on behalf of the Independent Trustees at the start of the Board’s annual contract renewal process earlier in 2024. In considering and approving the Advisory Agreements, the Trustees considered the information they believed relevant, including but not limited to the information discussed below. The Board considered not only the specific information presented in connection with the Meeting, but also the knowledge gained over time through interactions with Allspring Funds Management and the Sub-Advisers about various topics. In this regard, the Board reviewed reports of Allspring Funds Management at each of its quarterly meetings, which included, among other things, portfolio reviews and investment performance reports. In addition, the Board and the teams mentioned above confer with portfolio managers at various times throughout the year. The Board did not identify any particular information or consideration that was all-important or controlling, and each individual Trustee may have attributed different weights to various factors.

After its deliberations, the Board unanimously determined that the compensation payable to Allspring Funds Management and the Sub-Advisers under each of the Advisory Agreements was reasonable, and approved the continuation of the Advisory Agreements for a one-year term. The Board considered the approval of the Advisory Agreements for the Fund as part of its consideration of agreements for funds across the complex, but its approvals were made on a fund-by-fund basis. The following summarizes a number of important, but not necessarily all, factors considered by the Board in support of its approvals.

Nature, extent, and quality of services

The Board received and considered various information regarding the nature, extent and quality of services provided to the Fund by Allspring Funds Management and the Sub-Advisers under the Advisory Agreements. This information included, among other things, a summary of the background and experience of senior management of Allspring Global Investments, of which Allspring Funds Management and the Sub-Advisers are a part, and a summary of investments made in the Allspring Global Investments business.* The Board also received information about the services that continue to be provided by Wells Fargo & Co. and/or its affiliates (“Wells Fargo”) since the sale of Wells Fargo Asset Management to Allspring Global Investments Holdings, LLC, a holding company indirectly owned by certain private funds of GTCR LLC and Reverence Capital Partners, L.P., under a transition services agreement and an update on the anticipated timeline for exiting the transition services agreement. In addition, the Board received and considered information about the full range of services provided to the Fund by Allspring Funds Management and its affiliates.

The Board considered the additional services provided to the Fund due to the fact that the Fund is a closed-end fund, including, but not limited to, leverage management and monitoring, evaluating, and, where appropriate, making recommendations with respect to the Fund’s trading discount, share repurchase program, managed distribution program, and distribution rates, as well as shareholder relations activities.

The Board considered the qualifications, background, tenure, and responsibilities of each of the portfolio managers primarily responsible for the day-to-day portfolio management of the Fund. The Board evaluated the ability of Allspring Funds Management and the Sub-Advisers to attract and retain qualified investment professionals, including research, advisory and supervisory personnel.

The Board further considered the compliance programs and compliance records of Allspring Funds Management and the Sub-Advisers. The Board received and considered information about Allspring Global Investments’ risk management functions, which included information about Allspring Funds Management’s and the Sub-Advisers’ business continuity plans and their approaches to data privacy and cybersecurity and Allspring Funds Management’s role as fair valuation designee and derivatives risk management program manager. The Board also received and considered information about Allspring Funds Management’s intermediary and vendor oversight program.

* The trade name for the asset management firm that includes Allspring Funds Management and the Sub-Advisers is “Allspring Global Investments.”

Fund investment performance and expenses

The Board considered the investment performance results for the Fund over various time periods ended December 31, 2023. The Board considered these results in comparison to the investment performance of funds in a custom peer group that included funds selected by Broadridge Inc. (“Broadridge”) and additional funds that were determined by Allspring Funds Management to be similar to the Fund (the “Custom Peer Group”), and in comparison to the Fund’s benchmark index and to other comparative data. The Board received a description of the methodology used by Broadridge and Allspring Funds Management to select the funds in the Custom Peer Group and discussed the limitations inherent in the use of other peer Groups. The Board noted that the investment performance of the Fund was higher than the average investment performance of the Custom Peer Group for all periods under review. The Board also noted that the investment performance of the Fund was higher than its benchmark index, the Multi-Sector Income Blended Index, which is a custom index used by the Board to help it assess the Fund’s relative performance, for all periods under review.

The Board also received and considered information regarding the Fund’s net operating expense ratio and its various components, including actual management fees, and custodian and other nonmanagement fees. The Board considered this ratio in comparison to the median ratio of funds in the Custom Peer Group and in comparison to the median ratio of funds in an expense group that was determined by Broadridge to be similar to the Fund (the “Broadridge Group”, and together with the Custom Peer Group, the “Expense Groups”). Broadridge is an independent provider of investment company data. The Board received a description of the methodology used by Broadridge and Allspring Funds Management to select the funds in the Expense Groups, and an explanation from Broadridge of how funds comprising Broadridge expense groups and their expense ratios may vary from year-to-year. Based on the Broadridge reports, the Board noted that the net operating expense ratio of the Fund is higher than the median net operating expense ratios of the Expense Groups when taking borrowing costs for leverage into account, but lower than the median net operating expense ratios of the Expense Groups when excluding borrowing costs for leverage.

The Board took into account the Fund’s investment performance and expense information provided to it among the factors considered in deciding to re-approve the Advisory Agreements.

Investment advisory and sub-advisory fee rates

The Board reviewed and considered the contractual investment advisory fee rate that is payable by the Fund to Allspring Funds Management for investment advisory services (the “Advisory Agreement Rate”), both on a stand-alone basis and on a combined basis with the Fund’s contractual administration fee rate (the “Management Rate”). The Board also reviewed and considered the contractual investment sub-advisory fee rate that is payable by Allspring Funds Management to the Sub-Advisers for investment sub-advisory services (the “Sub-Advisory Agreement Rate”).

Among other information reviewed by the Board was a comparison of the Management Rate of the Fund with those of other funds in the Expense Groups at a common asset level. The Board noted that the Management Rate of the Fund was lower than the average rates for its Expense Groups.

The Board also received and considered information about the portion of the total advisory fee that was retained by Allspring Funds Management after payment of the fee to the Sub-Advisers for sub-advisory services. In assessing the reasonableness of this amount, the Board received and evaluated information about the nature and extent of responsibilities retained and risks assumed by Allspring Funds Management and not delegated to or assumed by the Sub-Advisers, and about Allspring Funds Management’s on-going oversight services. Given the affiliation between Allspring Funds Management and the Sub-Advisers, the Board ascribed limited relevance to the allocation of the advisory fee between them.

Based on its consideration of the factors and information it deemed relevant, including those described here, the Board determined that the Advisory Agreement Rate and the Sub-Advisory Agreement Rate were reasonable.

Profitability

The Board received and considered information concerning the profitability of Allspring Funds Management, as well as the profitability of Allspring Global Investments, from providing services to the fund complex as a whole. The Board noted that the Sub-Advisers’ profitability information with respect to providing services to the Fund and other funds in the complex was subsumed in the Allspring Global Investments profitability analysis.

Allspring Funds Management reported on the methodologies and estimates used in calculating profitability, including a description of the methodology used to allocate certain expenses. Among other things, the Board noted that the levels of profitability reported on a fund-by-fund basis varied widely, depending on factors such as the size, type, and age of fund.

Based on its review, the Board did not deem the profits reported by Allspring Funds Management or Allspring Global Investments from services provided to the Fund to be at a level that would prevent it from approving the continuation of the Advisory Agreements.

Economies of scale

The Board received and considered information about the potential for Allspring Funds Management to experience economies of scale in the provision of management services, the difficulties of isolating and quantifying economies of scale on an individual fund level, and the extent to which potential scale benefits are shared with Fund shareholders. The Board noted that the Fund is not engaged in a continuous offering that could help its assets grow, and that, as is typical of closed-end funds, there are no breakpoints in the Management Rate. Although the Fund would not share in any potential economies

of scale through contractual breakpoints, the Board noted that Allspring Funds Management shares potential economies of scale from its management business in a variety of ways, including through fee waiver and expense reimbursement arrangements, competitive management fee rates set at the outset without regard to breakpoints, and investments in the business intended to enhance services available to shareholders.

The Board concluded that Allspring Funds Management's arrangements with respect to the Fund constituted a reasonable approach to sharing potential economies of scale with the Fund and its shareholders. The Board also noted that it would have opportunities to revisit the Management Rate as part of future contract reviews.

Other benefits to Allspring Funds Management and the Sub-Advisers

The Board received and considered information regarding potential "fall-out" or ancillary benefits received by Allspring Funds Management and its affiliates, including the Sub-Advisers, as a result of their relationships with the Fund. Ancillary benefits could include, among others, benefits directly attributable to other relationships with the Fund and benefits potentially derived from an increase in Allspring Funds Management's and the Sub-Advisers' business as a result of their relationships with the Fund. The Board also reviewed information about soft dollar credits earned and utilized by the Sub-Advisers.

Based on its consideration of the factors and information it deemed relevant, including those described here, the Board did not find that any ancillary benefits received by Allspring Funds Management and its affiliates, including the Sub-Advisers, were unreasonable.

Conclusion

At the Meeting, after considering the above-described factors and based on its deliberations and its evaluation of the information described above, the Board unanimously determined that the compensation payable to Allspring Funds Management and the Sub-Advisers under each of the Advisory Agreements was reasonable, and approved the continuation of the Advisory Agreements for a one-year term.

Automatic dividend reinvestment plan

All common shareholders are eligible to participate in the Automatic Dividend Reinvestment Plan ("the Plan"). Pursuant to the Plan, unless a common shareholder is ineligible or elects otherwise, all cash dividends and capital gains distributions are automatically reinvested by Computershare Trust Company, N.A., as agent for shareholders in administering the Plan ("Plan Agent"), in additional common shares of the Fund. Whenever the Fund declares an ordinary income dividend or a capital gain dividend (collectively referred to as "dividends") payable either in shares or in cash, nonparticipants in the Plan will receive cash, and participants in the Plan will receive the equivalent in common shares. The shares are acquired by the Plan Agent for the participant's account, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Fund ("newly issued common shares") or (ii) by purchase of outstanding common shares on the open-market (open-market purchases) on the NYSE Amex or elsewhere. If, on the payment date for any dividend or distribution, the net asset value per share of the common shares is equal to or less than the market price per common share plus estimated brokerage commissions ("market premium"), the Plan Agent will invest the amount of such dividend or distribution in newly issued shares on behalf of the participant. The number of newly issued common shares to be credited to the participant's account will be determined by dividing the dollar amount of the dividend by the net asset value per share on the date the shares are issued, provided that the maximum discount from the then current market price per share on the date of issuance may not exceed 5%. If on the dividend payment date the net asset value per share is greater than the market value ("market discount"), the Plan Agent will invest the dividend amount in shares acquired on behalf of the participant in open-market purchases. There will be no brokerage charges with respect to shares issued directly by the Fund as a result of dividends or capital gains distributions payable either in shares or in cash. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open-market purchases in connection with the reinvestment of dividends. The automatic reinvestment of dividends and distributions will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such dividends. All correspondence concerning the Plan should be directed to the Plan Agent at P.O. Box 505000, Louisville, Kentucky 40233 or by calling 1-800-730-6001.
