Special Global Small Cap Fund

Administrator Class EKGYX

This annual shareholder report contains important information about Special Global Small Cap Fund for the period of November 1, 2023 to October 31, 2024. You can find additional information about the Fund at allspringglobal.com. You can also request this information by contacting us at 1-800-222-8222.

What were the Fund costs for the past year?

The table explains the costs you would have paid within the reporting period based on a hypothetical \$10,000 investment.

CLASS NAME COSTS OF A \$10,000 INVESTMENT COSTS PAID AS A % OF A \$10,000 INVESTMENT

Administrator Class \$150 1.39%

The manager has contractually committed to waive fees and/or reimburse certain expenses to the extent necessary to cap the Fund's total annual fund operating expense ratio at a specific amount. Without this cap, the costs shown above may have been higher. Please see the prospectus for the amount and the expiration date of the cap. Prior to or after the commitment expiration date, the cap may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

How did the Fund perform last year and what affected its performance?

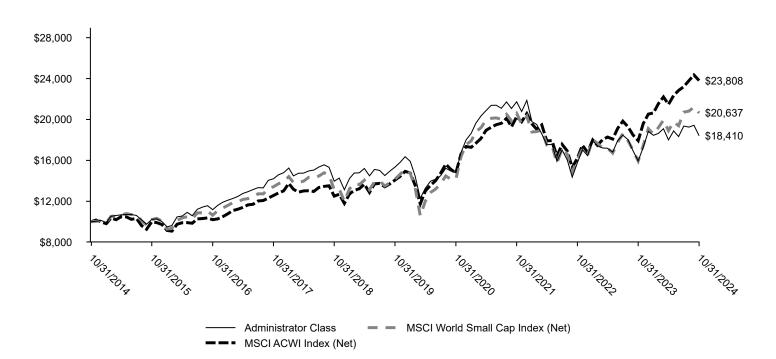

Equities were volatile in response to ongoing inflation concerns, varying economic data points, and diverging central bank policies.

Minor changes to sector and region positioning included an increase in financials and North America while reducing the weight in consumer discretionary and Europe as reward/risk ratios dictated.

CSW Industrials, Inc., the largest contributor, manufactures relatively low-cost/high-value niche products across a variety of markets, including HVAC, plumbing, and general industrial. The combination of short- and long-cycle end-market exposures helps dampen volatility, leading to steady and predictable cash flow generation. CSW delivered growing revenues and margins with strong cash conversion and no leverage.

The largest detractor, Helen of Troy Ltd., is suffering from increased competition, leading to the need to step up investment. Management's poor capital allocation decisions of buying back stock reduced its financial flexibility. Execution missteps on an acquisition integration and start-up of a new distribution center led to higher costs and reduced sales. We were disappointed with Helen and exited the position.

Total return based on a \$10,000 investment

AVERAGE ANNUAL TOTAL RETURNS (%)

| | 1 Year | 5 Years | 10 Years |
|---|--------|---------|----------|
| Administrator Class | 15.43 | 3.71 | 6.29 |
| MSCI World Small Cap Index (Net) (Strategy) | 29.45 | 7.81 | 7.51 |
| MSCI ACWI Index (Net) (Regulatory) | 32.79 | 11.08 | 9.06 |
