

# Ultra Short-Term Income Fund

Class C

WUSTX

This annual shareholder report contains important information about Ultra Short-Term Income Fund for the period of September 1, 2023 to August 31, 2024. You can find additional information about the Fund at [allspringglobal.com](http://allspringglobal.com). You can also request this information by contacting us at 1-800-222-8222.

## What were the Fund costs for the past year?

The table explains the costs you would have paid within the reporting period based on a hypothetical \$10,000 investment.

CLASS NAME	COST OF A \$10,000 INVESTMENT	COSTS PAID AS A % OF A \$10,000 INVESTMENT
Class C	\$129	1.25%

The manager has contractually committed to waive fees and/or reimburse certain expenses to the extent necessary to cap the Fund's total annual fund operating expense ratio at a specific amount. Without this cap, the costs shown above may have been higher. Please see the prospectus for the amount and the expiration date of the cap. Prior to or after the commitment expiration date, the cap may be increased or the commitment to maintain the cap may be terminated only with the approval of the Board of Trustees.

## How did the Fund perform last year and what affected its performance?

Although they were volatile throughout the 12-month period, yields fell as expectations for a monetary policy shift evolved. Investors began the period pricing in additional rate hikes by the U.S. Federal Reserve and ended it expecting a first rate cut. Credit spreads narrowed and remained subdued for much of the period, near the tightest levels in years for many credit sectors.

Portfolio duration remained close to its strategic neutral (longer than the benchmark). The portfolio was positioned modestly up in quality and credit exposure was reduced as valuations became more extreme. The portfolio was positioned to benefit from a diversified set of non-benchmark securitized exposures.

The top contributors to the Fund's performance were duration and curve positioning, credit quality allocation, and sector allocation (including diversified securitized exposures outside the benchmark). Security selection also contributed.

The main detractor from performance was a small allocation to non-agency collateralized mortgage obligations.

## Total return based on a \$10,000 investment

AVERAGE ANNUAL TOTAL RETURNS (%)
